## Grade Crossing Not Permitted

### Public Service Commission Denies Application to Cross Tracks of Two Railroads at Washington Avenue During Construction of New Bridge—Commission Suggests Simple Solution of Problem.

The petition of the city of Kingston asking for permission to establish a temporary grade crossing of the New York, Ontario and Western railroad at Washington avenue has been denied by the public service commission on the ground that the commission has no jurisdiction in the matter.

Some time ago the state highway department condemned the present bridge over the Esopus creek in Kingston, and the board of public works and the town board of Ulster recently awarded a contract for the erection of a new steel bridge to replace the present structure.

Since the awarding of the contract the city and town authorities have been busy erecting a temporary bridge over the creek a short distance from the present bridge, to be used by traffic until the new bridge should be completed.

The city authorities decided to have the approach to the temporary bridge located alongside the Washington avenue viaduct and crossing the tracks of the two railroads at grade, and applied to the public service commission for permission to establish this temporary grade crossing. A hearing was held before C. E. Vanneman, chief engineer of the commission, on June 18, at which time Corporation Counsel James Jenkins appeared in behalf of the city, C. L. Andrus, general counsel for the Ontario & Western railroad, and Harry H. Fleming for the Ulster & Delaware railroad.

At the hearing the city authorities argued that permission be granted on the ground that if it was not granted, it would make necessary a long detour of traffic through Saugerties. Chief Engineer Vanneman made a suggestion to the city and town authorities that it would be possible to take care of the matter without making it necessary to divert traffic through Saugerties as stated by the city and town authorities.

In that connection the public service commission has written the railroad attorneys that "This is to inform you that the commission has called to the attention of the city a suggestion made by the chief engineer at the hearing, that a reasonable detour could be provided without the necessity of a long detour over the highway, such detour requiring only the construction of a north approach to the existing Washington avenue viaduct."

The suggestion of Mr. Vanneman in brief was to fill in alongside the Washington avenue viaduct at the foot of the viaduct nearest the present Esopus creek bridge and remove the present rail from the viaduct, allowing traffic to pass over the fill and thus approach the temporary bridge. To fill in with earth and stone alongside the viaduct at the spot mentioned would cost approximately \$12,000, it was stated.

By adopting this plan it would be possible for traffic to cross over the Washington avenue viaduct and over the fill and to cross on the temporary bridge.

In order that traffic at the present time may approach the three houses on that side of the viaduct, there is a brick driveway leading down and alongside the viaduct to the street below. This driveway is located at the entrance to the Washington avenue viaduct nearest the present creek bridge.

The fill could be such that those residing in the three houses could walk from their homes over the temporary fill and onto the viaduct. Undoubtedly the entire matter will be taken up at the next meeting of the board of public works to be held later in the month.

## THINGS THAT MAKE WORK INTERESTING.

Those who think the life of a fire tower watchman must be lonely and tedious should read the following record of the activities of Alfred Waterman, the fire tower watchman here.

To date this season Mr. Waterman has registered 182 visitors, this being 53 more than at the same time last year. He has reported 12 fires to the fire department and has killed 19 porcupines.—East Branch Correspondence of the Delaware Express, Delhi.

### Wildcats Menace Wild Life.

According to Inspector DeSilva, of the state conservation commission, who lives at Margaretville, wildcats in that vicinity are proving a menace to Catskill mountain wild life. In one day, one cat killed six rabbits. During the past winter hunters of the town of Hardenbergh, Ulster county, and Middletown, Delaware county, killed at least ten wildcats.

## Yeast King Won't Contest Divorce

### Julius Fleischmann Not to Oppose Wife's Suit in Paris—Renowned Settlement of \$5,000,000—Reconciliation With First Wife Rumored.

By Telegram to The Freeman.  
Paris, July 12.—Petition for divorce has been filed in the Seine Tribunal by a "Madame Fleischmann", who is believed to be Mrs. Dolly Fleischmann, wife of Julius Fleischmann, millionaire American yeast manufacturer, of New York and Cincinnati. It was learned, this afternoon.

New York, July 12.—Julius Fleischmann, millionaire yeast king, former mayor of Cincinnati, will not contest the divorce suit brought by his second wife in Paris, where, it is reported, Fleischmann saw them and came to the conclusion that the pair truly loved each other.

Mrs. Fleischmann, who is the yeast king's second wife, was the divorced wife of Louis Hemmway, silk millionaire, and O'Brien has made two previous matrimonial ventures, having been the husband of Mae Murray, film star, and Irene Fenwick, actress.

The romance between O'Brien and Mrs. Fleischmann started a year ago when O'Brien went to Fleischmann Field as a member of a polo team.

Rumor many times in the intervening months has linked the names of the pair. Mrs. Fleischmann and O'Brien, but it was not until three weeks ago that things definitely came to a head. Mrs. Fleischmann left for Paris, after having been much in the company of O'Brien. A week later O'Brien also sailed for Paris, and he in turn was followed by Fleischmann.

Fleischmann, however, remained only long enough to interview his wife and youthful rival, then booked passage for America and returned on the "Berengara."

With the reported announcement of Fleischmann's intention not to contest the suit of his second wife, rumors persist that he soon may effect a reconciliation with his first wife, Mrs. Lily Fleischmann. Fleischmann was divorced from her in 1920, when she received \$2,000,000 dower and other gifts from him.

## Pilot Met Death In Propeller

By Telegram to The Freeman.  
Washington, July 12.—Walking backwards into the flying propeller of an airplane at Hampton Roads, Virginia, yesterday, Lt. Herbert Schiff of New York city, a naval aviator, was terribly mangled, according to report to the navy department today.

Schiff's commission was on the naval reserve flying corps and he had been stationed at the naval air station here for 15 days' training in actual flying.

He was an experienced pilot, having been in the air for 900 hours. Rear Admiral William A. Moffet was in the plane that caused Schiff's death.

Lt. Schiff was acting as second pilot of the plane and Lieut. Alfred Williams was first pilot. The party had made a trial run from Washington to Hampton Roads.

The officials say the accident is unexplainable, why an experienced pilot, such as Schiff, was should get in the way of a flying propeller.

## OPEN AIR GOSPEL SERVICE SUNDAY

The Rev. Arthur S. Cole will be the speaker at the Open Air Gospel Service which is conducted by the Young Men's Christian Association Sunday evening at 7:30. Mr. Cole has given an address each year during the time of these meetings and has always had a good audience. He has proved to be a very able speaker and those who find it possible to attend Sunday evening will be well repaid.

Dr. Gillett has always shown a splendid spirit in the way of cooperation and has through the Presbyterian Sunday School furnished an orchestra for these meetings.

Many of those who attend find it convenient to drive to the Association building by auto and park their car within bearing distance of the speaker.

W. W. Brady conducts the Song Service. The old Gospel songs are well liked and the congregational singing proves helpful.

These meetings begin promptly and close within an hour's time. All are cordially welcome.

## AWARD CONTRACT FOR SAUGERTIES BANK

The contract to erect the new building of the First National Bank on Main street, Saugerties, has been awarded to G. A. Glantz of 405 Lexington avenue, New York city. There were five bidders for the job and Mr. Glantz was the lowest. The building, according to the plans, will be a beautiful one and a great ornament to Saugerties. Work on the job is expected to commence within a short time.

## Collision With Train, Two Women Die

### Mrs. Grant and Daughter, Former Residents Here, Die Beneath Wreckage of Automobile and Train.

—Mr. Grant and Mrs. Fisher's Baby, the Other Occupants, Escape With Injuries.

Mrs. Burton A. Grant of Candor and her daughter, Mrs. Christopher Fisher, of New York city, were killed Friday afternoon when the automobile in which they were riding was struck by a milk train of the Delaware & Hudson Railroad at Potter's crossing, near Unadilla.

The car was driven by Mr. Grant, who received cuts about the face and slight bruises and lacerations about the body. The other occupant of the car was Leona Fisher, the two months' old baby of Mrs. Fisher's. The baby was uninjured.

The women were thrown through the windshield and were caught under the wreckage and died instantly. The baby was hurled through the side of the car for a short distance and when found was lying on a pillow, unharmed.

Mr. Grant was unable to explain the accident. The view of the track is said to be obstructed at this crossing, which has been the scene of several fatal accidents in the last few years.

Mr. and Mrs. Grant formerly resided in this city at 126 Prospect street, where Mr. Grant conducted a milk business, selling out about a year ago to J. A. Joyce. Mrs. Fisher before marriage was Miss Leona Grant, who was a very popular local girl.

The party had been touring New York state and a few days ago, passed through Kingston and while in town visited friends.

## Family of Five Killed by Train

By Telegram to The Freeman.  
Hackensack, N. J., July 12.—Five persons were killed when an Erie railroad train hit an automobile near Passaic Junction, five miles west of here today. The accident occurred on the Bergen county short cut.

The dead are Mrs. Julia Bronski, 43; her son Andrew, 21, who drove the automobile; and three small children, Mary Starkski 10 years old of Fourth street, Passaic, Anna Skarta, 6 and her brother Michael, 7.

## Assassin Shoots Egypt's Premier

By Telegram to The Freeman.  
Cairo, Egypt, July 12.—An attempt was made today to assassinate Premier Zagheul Pasha, of Egypt.

The premier was about to depart for Alexandria when the assailant fired across the railway station platform, which was crowded at the time.

It was first reported that the premier had been killed but later, it was learned, he suffered only a flesh wound. His condition is not serious.

Zagheul Pasha fell to the floor after the shot was fired and, crouched, thinking he was dead, attacked the assailant and attempted to lynch him. He was badly beaten before being rescued by the police.

The premier was taken to his home where he was reported later to be resting easily.

## TWO WOMEN HURT IN AUTO COLLISION.

Miss Charlotte Jones of this city was injured in an automobile collision near Pine Hill last Sunday evening when the new Buick car of A. C. Fenton, a well known attorney of Margaretville, in which she was riding, had a head-on collision with the car of John Farady of New York city. The force of the collision threw Miss Jones against the dome of the Fenton car and four arteries were severed.

Mrs. Philip Derringer of Margaretville, mother of Mrs. Fenton, also an occupant of the Fenton car, met more serious injury, receiving a three inch cut on her forehead, losing a large chunk of flesh out of one cheek and injuring one eye so badly she may lose its sight. Mr. Fenton was not injured.

Mr. Fenton was driving close to the shoulder of the new road in that section and saw the Farady car approaching but did not realize there was danger until the crash of the collision.

## Virginian On Claims Committee.

By Telegram to The Freeman.  
Washington, July 12.—Henry W. Henderson, a Virginia Republican, was appointed today by President Coolidge as one of the American members of Mexican-American mixed claims commission.

## Fatal French Railway Accident.

By Telegram to The Freeman.  
Paris, July 12.—Three persons were killed and fifteen injured when the Strasbourg express collided with a freight train, according to advices from Chalons-sur-Marne today.

## Old Musket for Memorial House.

An old flintlock musket belonging to Captain Mathusalem DuBois, a soldier of the Revolution, who was born at Libertyville, N. Y., October 2, 1751, and died there October 12, 1829, has recently been placed in the Memorial House on New Paltz, by Mrs. Henrietta R. DuBois and Mrs. Emily Pharrar.

## LaFollette Sees Chances Better

### Is More Hopeful of Success Since Democrats Named Davis—To Pass Hat for War Chest.

By Telegram to The Freeman.  
Washington, D. C., July 12.—Optimism reigned unchecked in Senator Robert M. LaFollette's camp today as lieutenants brought into headquarters here glowing reports of progress already made in the national campaign that is rapidly getting under way in all sections of the country.

No time has been lost since the Conference for Progressive Political Action, in Cleveland, formally endorsed LaFollette as an independent candidate for the presidency. While the eyes of the national were focussed on the deadlocked Democratic national convention in New York, LaFollette and his managers have been busy building up a far-reaching organization. Representative John M. Nelson, Republican, Wisconsin, LaFollette's campaign manager, has reported that national headquarters in Chicago is working in overtime schedule to perfect campaign plans.

LaFollette himself is hopeful regarding his chances in the November election, more optimistic than ever, his friends declared, since the Democrats nominated John W. Davis. LaFollette is maintaining a strict reticence about political affairs, withholding public comment until after his vice-presidential candidate shall have been chosen next Saturday when the national committee of the Conference for Progressive Political Action meets with him here for that purpose. But LaFollette days and nights are filled with conferences; his workers are pouring in upon him daily for instructions.

Representatives of 15 of the so-called standard railroad unions have been in Washington two days. They came here ostensibly on union business. Most of their time has been occupied in conference with LaFollette and his son, going over campaign plans, cutting down the lists of vice-presidential candidates, making arrangements for appealing to the people for voluntary financial subscriptions.

Plans for raising funds for LaFollette's campaign were discussed today at a meeting in Johnston's office of a special sub-committee of the Progressive conference. The committee decided to ask for small voluntary subscriptions from all who may join LaFollette's drive and to appeal to all organizations, labor and farm, which endorsed the Wisconsin senator.

## Bryan May Run With La Follette

### In Event of Complications, that Plan Might Allow Him to Enter White House by Representatives' Route.

By Telegram to The Freeman.  
Washington, July 12.—Charles W. Bryan, Democratic vice-presidential nominee, has been suggested to Senator Robert M. LaFollette, as a running mate in the Wisconsin senator's independent race for the White House this year, it was learned today.

Friends have urged that LaFollette endorse Governor Bryan, it was said, feeling that with LaFollette he will poll sufficient votes to win the vice-presidential election. In the event the presidential election were thrown into the House and Senate, which is not impossible, these friends declared Democrats and Progressives, by uniting forces, could elect Bryan to the White House.

LaFollette's headquarters here refused to comment on the report.

There was a growing belief among political observers in Washington today that in view of what promises to be a tight three cornered presidential race, one of the vice-presidential nominees, if the election goes into Congress, would stand an excellent chance to enter the White House.

This is why LaFollette and his advisers are taking extreme caution in naming a running mate. LaFollette's vice-presidential candidate will be selected next Saturday at a meeting here between the senator and the national committee of the committee for Progressive political action.

Those who have been mentioned most prominently to run with LaFollette are:

## CHANGE AT "BLUE BIRD FASHION SHOP."

David Strawgate has filed a certificate with the Ulster county clerk stating that he has sold his interest in the business conducted under the name "Blue Bird Fashion Shop," at 40 Broadway, and Isaac Strawgate has filed a certificate under the assumed name business law that he is conducting a business at 40 Broadway, Kingston, under the name and style, "Blue Bird Fashion Shop."

## Old Musket for Memorial House.

An old flintlock musket belonging to Captain Mathusalem DuBois, a soldier of the Revolution, who was born at Libertyville, N. Y., October 2, 1751, and died there October 12, 1829, has recently been placed in the Memorial House on New Paltz, by Mrs. Henrietta R. DuBois and Mrs. Emily Pharrar.

## McAdoo Gives O. K. to Davis

### Says He is a Progressive and That Davis-Bryan Ticket Will Have His Cordial Support—Issues Statement Before Sailing for Europe.

By Telegram to The Freeman.  
New York, July 12.—William Gibbs McAdoo today broke his silence on political matters, styled John W. Davis as a "progressive" and urged his followers to support him in the coming presidential election.

Admitting that there had been some doubt as to Davis's progressivism because of his association with "big banking houses and corporate interests" McAdoo said that such doubts were unjustified.

A lawyer, he declared, is to be no more judged by his clients than a physician by his patients.

## The McAdoo Statement.

McAdoo's statement was given out by him at the dock just before he sailed for Europe.

"Mr. Davis and I have been friends for 12 years and I had the pleasure of discussing the political situation with him yesterday," McAdoo said. "The great body of progressive Democrats who supported me so strongly in the convention have been anxious to know my attitude toward Mr. Davis's candidacy and my visit was for the purpose of learning from Mr. Davis direct his views on important issues before the country."

"I am satisfied he is in full accord with the progressive program outlined in the Democratic platform."

"Mr. Davis's professional connections and associations with great banking houses and corporate interests which are concededly efficient in every way have raised doubts in the minds of many as to his progressivism."

"Those doubts are not justified because a lawyer's views on economic, political and social questions are no more to be judged by his professional associates than a physician to be judged by the character of his patients."

"The influence and power of these progressive forces must not be dissipated by division between various political movements. They must rather be consolidated and used like an irresistible battering ram on the instrumentality of service to the people. Clearly there is no promise in the Republican party, clearly there is promise in the Democratic party if this progressive influence is wisely and vigorously used within that political organization."

"The hope of genuine reform and progress is more likely to be realized at this time through the Democratic party than through any of its opponents."

"I shall therefore give the Davis-Bryan ticket my cordial support and shall take part in the campaign on my return early in September."

Several hundred persons were at the dock to bid goodbye to friends sailing on the Homeric. Many of them came to see McAdoo off, but all cheered when the defeated candidate appeared on deck. Crowds surged around him and insisted on shaking hands with him.

## Shot Police for Rum Runners

By Telegram to The Freeman.  
New York, July 12.—Mistaking a police boat running without lights for rum runners they were pursuing, custom house men in the launch "Surveyor" early today shot T. Dennis Glavin, temporary supervisor of the marine division, and Patrolman John Reich.

The wounded men were taken to the Staten Island hospital, where physicians said Glavin was in a serious condition with three bullets in his body. Reich was wounded in the arm.

## Storking Walkkill With Bass.

Two cans of small mouth black bass which were received from the New York State Fish Hatchery, were placed in the Walkkill creek near New Paltz during the past week by E. C. Elmore.

## Penalties on Water Bills.

The Kingston City Water Department is engaged in its usual quarterly collections. After July 20, penalties must be added to unpaid bills.

## McAdoo Gives O. K. to Davis

### Says He is a Progressive and That Davis-Bryan Ticket Will Have His Cordial Support—Issues Statement Before Sailing for Europe.

## WHITE EAGLE BAND PICTURE ON SUNDAY.

The first annual picnic of the White Eagle Band will be held on Sunday at the J. T. Teslow estate on Third avenue. The program will commence at 1 o'clock and continue until 10 in the evening.

From 2 o'clock until 6, the band will give a concert and in the evening there will be singing by a quartet. A cornet and trombone duo will be rendered by Joseph P. Buchholz and Walter F. Madjeski, and Francis E. Bujah will render a solo.

## Increase in Autom'bile Camps

Telegraph to The Freeman.  
Washington, D. C., July 12.—Some of the extent and growth of automobile camping in the United States was revealed here today when the 1924-25 Official Camping and Campsite Manual came off the press and was put into distribution by the national headquarters of the American Automobile Association.

The new manual lists close to 2,000 campsites, many of which are equipped with every facility for the motor tourist's comfort and convenience. California tops the list in the number of camps for a single state, while Wisconsin, Michigan, Illinois and Iowa run a close race for second place.

According to the Touring and Transportation Board of the A. A. A., the development of the publicly-owned motor campsite has opened an entirely new chapter in the history of motor touring and the results of the new touring will be to decentralize the tourist business and recreational activity.

The board, for example, points to the situation in the small town as typical of this trend. "There are thousands of small towns which could not possibly support a first class hotel and maintain it as a paying investment, but which are nevertheless able to provide suitable camping grounds and thus make a strong bid for their share of the tourist patronage which formerly escaped them altogether," it is contended.

Much has been learned about motor camping within the last few years, and this information has been carefully compiled by the A. A. A. for incorporation in the official manual that is now going to the association's affiliated motor clubs throughout the country. With approximately a million more motorists on the roads this year the public camp has become a necessity, and it has become equally necessary for the tourist to be posted on the location and equipment of campsites along routes he plans to travel.

By reason of the arrangement of camp lists according to various transcontinental routes and inter-sectional highways the A. A. A. manual clearly shows the tourist the number, position and caliber of the public campsites which he will encounter en route.

A point that is at once apparent from a reading of the new manual is the increase in the number of public camps over eastern routes. While the west is still far in the lead in motor camping a noticeable trend toward more and better camps in the east is evident.

The new manual will be distributed through affiliated A. A. A. motor clubs which are now located in nearly every important city and town in the country.

## KITCHENETTE RECIPES

by M. Schmitt  
FOOD AUTHORITY ON NUTRITION

### MACARONI BIRD'S NEST

A 15-Minute Dish  
1 package of macaroni; cook in salted boiling water until tender which generally takes about 10 or 12 minutes. 1 can peas, 2 tablespoons butter, 1 can condensed tomato soup, 6 slices bacon cut into squares, 1/2 cup grated cheese.

Method: Pan-broil the bacon; in another pan heat peas with butter and in another pan heat the tomato soup, adding equal quantity of water. Take the fat from the bacon and mix in the tomato soup. Serve macaroni in nest form or in a large platter or dish. Set peas in center of it; then pour tomato sauce, flavored with bacon, over the top. Sprinkle with grated cheese if desired. Top off with bacon.

### CORN A LA SOUTHERN

2 cups corn, 1 teaspoon of salt, 1 1/2 tablespoons of melted butter, 2 eggs, 1/2 teaspoon pepper, 2 cups of milk, a few pieces of chopped pepper.

Method: Add lightly beaten eggs, salt, pepper, butter and milk to corn. Then add chopped peppers. Turn into buttered baking dish and bake 40 minutes in moderate oven.

### "Tom Thumb"

Tom Thumb was the professional name of Charles S. Stratton (1839-1883), a famous American dwarf exhibited by P. T. Barnum in America and Europe. When first placed on exhibition (1842), he measured two feet in height, and weighed 16 pounds; in 1863 he had increased to 31 inches, and later to 40 inches.

## Colette Was His Actress Sweetheart

By ANTHONY REIMERT  
(© 1924, Western Newspaper Union.)

"MY GOD, Parrish!" Sergeant Smith stared at the constable who had entered the office. "Jameson's mother! Mother?"

"That's so, sergeant. Come from Ontario to see her son."

"What's she like, Parrish?"

"One of those dear old ladies you read about."

"And him waiting to go down under escort to be hanged," muttered the sergeant. "Parrish," he said, suddenly, "that woman hasn't come two thousand miles to learn that. Listen!"

Jameson, in his cell, sat with his head in his hands. He had shot the storekeeper in a fit of frenzied jealousy over Colette, the little actress who had somehow drifted north, a derelict. Since then his fate had been inevitable. He had been tried and found guilty. Colette's frenzied pleas had not saved him. The girl had been sent south, and in a week's time Jameson must start on his own grim journey unless—

The cell door opened. Sergeant Smith stood there. "Jameson, your mother's here from Ontario."

"God!" The constable sprang to his feet.

"She doesn't know. And we're not going to let her know. We're giving out you've got to start north on patrol this evening. Till then you're a free man, so long as you don't stray from the post. I'm trusting you, Jameson. Keep up the bluff. You'll pretend to start tonight under charge of Smith—and we'll hustle her out on the boat tomorrow. Savvy?"

Jameson nodded like a man in a daze. The sergeant removed his shackles. He went out. In the office the little, gray-haired old woman was waiting. With a cry she fell upon his neck. The sergeant turned his head away.

"Guess he can't beat it," he told Parrish, "but keep an eye on him."

All that afternoon the old woman and the constable strolled about the fort. Sometimes they were out of sight for a few minutes, but it was clear Jameson had no intention of trying to make a get-away.

"I'm so proud and happy to see my son doing so well," the old woman told the sergeant gratefully.

"It's a pity he's got to start on patrol tonight," said Smith, "but that's orders from district headquarters."

"My son must do his duty," she answered proudly. "I'd be the last one to try to prevent him."

They had given the old lady the visiting inspector's empty room. The two sat there most of the afternoon. Toward dusk Parrish saw the old lady cross the parade ground toward the store.

"Guess she's going to buy him something," he muttered. He took the precaution to look in at the window of the inspector's room, however. Jameson was crouching there, his head in his hands, sobbing.

"Poor devil!" thought Parrish. Smith came out of the office. "Time to start that fake patrol," he told him. "Hustle him a mile out of camp, come back round the cut-off and lock him into the cell again."

Parrish nodded. "Old woman's at the store," he said.

"Wait till she gets back. Then it's good-by." He crossed to the inspector's room. Just then the new storekeeper came hurrying up.

"Say—you know about old Mrs. Jameson?" he asked.

"Eh? What do you mean?"

"No business of mine," grumbled the dull-witted man. "Only she went down the road and I heard a horse going like h— for leather a few minutes ago in the direction of the brush, too."

"What?" The sergeant and the constable burst into the inspector's room. Jameson was still sitting there, his back toward them, his face hidden in his hands.

"Jameson!"

As the constable did not look around the sergeant advanced and shook him by the shoulders. Slowly Jameson turned his head.

They stared with stupefaction. They yelled with fury.

"You!"

Colette, the little actress, smiled. "You'll have hard work catching Jim in the dark," she smiled. "That's a good horse I brought him."

### Appreciated Effort

A pastor was called to a former charge to officiate at a burial. He arrived in town in time to chat with old friends, but soon saw a funeral party coming. He hastened to the cemetery and informed the undertaker he was to officiate. He performed his duties with usual sincerity.

As he was leaving the cemetery he saw another funeral procession approaching, and it dawned on him that he had participated in the wrong service.

The next day the undertaker, who had been in charge of the first funeral, received a letter from the surviving relatives, thanking him for his thoughtfulness in having the pastor at the grave who spoke such words of comfort to them.—Indianapolis Star.

### Slam for Mother

Conceded six-year-old (after caller has gone)—Mother, am I really the image of you, or was that lady just trying to hurt my feelings?—Boston Transcript.

### Cleopatra Not All Bad

They liked Cleopatra in Alexandria and her statues were not overthrown after her death. It must be, therefore, that she was less wicked than her enemies said. And then one must not forget that beauty is one of the virtues of this world.—Anatole France.

## CALVIN COOLIDGE, JR., IS LAID TO REST.

President and Mrs. Calvin Coolidge are shown in the little cemetery in Plymouth, Vt., at the grave side of their beloved son, Calvin, Jr. John Coolidge, their only remaining son, stands to the left and rear of his casket.

### ATTRACTIVE HOME OF SPENCER'S SCHOOL

The modern new building recently completed for Spencer's Business School at 237-239 Fair street was arranged to provide the special needs of a modern business college. Spencer's School now represents the last word in business college construction. The new building is three stories above the basement, and the two upper floors are occupied by the school. Convenient class rooms, and quiet recitation rooms are arranged on each floor, and every department is provided with modern furniture and equipment.

Spencer's Business School urges young men and women wishing to prepare themselves for the highest

grade positions, to visit this modern new place. The office, on the second floor, is open daily from 8 a. m. to 5 p. m. Surroundings, look carefully into its 5 p. m. courses of study and the manner in which they are presented, and make personal examination of what the school teaches and how it trains its pupils. Such an inspection will be well worth the student's time, and will reveal many improvements over the old methods in use several years ago.

Young men and women who believe that daylight quiet and unobtrusive surroundings are conducive to the highest benefits to be derived from commercial education, will find such advantages here. The president of the school is now ready to enroll pupils for the next term, and pupils and parents are cordially invited to make a personal visit to

KINGSTON, N. Y., JULY 12, 1924.

An unknown resident of Altonna, Pa., has sent the Game Commission of that State \$25 "for a ring-necked pheasant I cooked that was shot out of season in 1921." If every customer of the bootleggers should make similar amends, the government could afford to reduce taxes.

Boston does not like the "unfriendly" proposition to create a new province in Australia to be called New England, but that designation of a group of our states is unofficial and the right to it of a part of the British empire is more inherent. Besides every part of Australia is now more of a "New England" in blood than the said group of states now pretty well crowded with progeny of the foreign-born.

## PLATFORMS AND THE TARIFF.

In the party platforms of 1924 as in past policies and achievements, the superiority of the Republican party in practical and definite handling of public issues is once more illustrated. On all important issues the Democratic platform is vague and evasive. The Republican platform is direct and clear.

There is an instance of this in declarations on the tariff. The Republican platform comes out definitely for protection, designed "to support the high economic level of life for the average family and to prevent a lowering to the levels of economic life prevailing in other lands." The emergency agricultural tariff act of 1921 and the general tariff act of 1922 are endorsed, with special mention of the flexibility clause which permits an increase or decrease in rates to meet changed conditions. The Democratic tariff plank is definite to the extent that it denounces the Republican tariff law, but it is indefinite when it undertakes to tell where the Democratic Party stands. Here is the language used by the Democrats.

Trade interchange, on the basis of reciprocal advantages to the countries participating, is a time-honored doctrine of Democratic faith. We declare our party's position to be in favor of a tax on commodities entering the customs houses that will promote effective competition, protect against monopoly, and at the same time produce a fair revenue to support the government."

Democratic platform makers did not endorse the tariff act which the Republicans repealed. If they had there would be some definite meaning to their tariff plank. They remained silent on their only time-honored principle—that a protective tariff is unconstitutional—and introduced a new expression in Democratic platforms, "reciprocal advantages," and advocate a tariff that will "promote effective competition," but do not indicate what they consider "effective competition."

What constitutes "effective competition" is an intensely practical matter. If, for instance, we are producing in this country certain commodities to the extent of \$100,000,000 a year and the tariff is such as to permit the importation of \$10,000,000 a year of similar commodities, to what extent should the tariff be lowered to make the competition "effective"? Should we lower the tariff enough to permit the importation of such commodities to the value of \$45,000,000 more, thus giving the foreign producer an equal break in our market?

If that is what the Democrats mean by "effective competition," the American workman will know exactly what he is voting for if he votes the Democratic ticket. He will know that the Democrats propose to take away from him approximately half of his home market and give it to the foreign producer. He will know that the Democrats propose to throw out of employment approximately half of the people engaged in his industry in order that a correspondingly large number of persons may be given employment in a competing industry in Europe or Asia.

It is admitted by the New York World that the Democratic platform is lame in this respect. It is asserted by that paper that the Democratic nominee for president should elucidate the tariff plank. But a president does not make a tariff law. A tariff bill must originate in the

House of Representatives. The nominee for president cannot bind his party associates who are candidates for Congress. The platform being admittedly vague and a menace to American industry, the voter cannot wisely pursue any other course than support the party which had the intelligence and the frankness to tell just exactly where it stands on the tariff question—for protection to American labor and American capital.

## That Body of Yours

## INCREASING THE FATS IN JOINT CONDITIONS.

For years you have thought that most of our rheumatism and painful joints was caused by an excessive meat or protein diet.

Accordingly eggs and meat have been taken off the dietary of the rheumatic, or arthritic patient, as he is now called, and he has loaded himself up with starches to make up for this.

It has been learned lately that an excessive diet of starches—bread and vegetables—can derange the intestine, and the resultant product in the blood causes arthritis or rheumatism.

If you are afflicted with these painful joints and have had your meat and eggs cut off, and now find that your bread and vegetables are to be cut down, you will wonder what is left.

You will remember that the main food stuffs were meat and white of egg, starches and sugars, fats, salts and water.

It looks like a fat, salt and water diet.

And as a matter of fact, physicians and institutions using special work on these painful joint conditions, are now using a diet in which the fats take the place to a large extent of the meats and starches. The diet for the ordinary person in good health is about as follows: one part meat or eggs, two parts fats (butter or milk), and three parts starches.

This spread over the three meals of course.

This new diet for the rheumatic patient does not interfere with the meat and eggs, but cuts down the starches until they are about one-third of the amount taken by a normal person, and the fats are increased nearly four times.

With this idea in mind, and with that tendency to painful joints as a part of your make-up, it would then be good sense on your part to give this diet matter a little attention.

I will not weary you with any set diets because if you are real ill you are better in the care of your own family doctor.

But to avoid the condition, or to help clear it up, a little idea of the foods that are rich in fats, and poor in starches is important. Because this is what you are seeking to attain, a low starch, and a high fat diet.

Accordingly the fruits low in starches are peaches, lemons, grape fruit, oranges and strawberries.

The cereals low in starches are rice, oatmeal, and the wheat products.

The vegetables low in starches are asparagus, beets, cabbage, lettuce, radishes, squash, spinach and carrots.

The meats and fish rich in fats are bacon, beef tenderloin, lamb chop, goose and turkey, and sardines and salmon.

You know of course that milk, cheese, butter and cream are rich in fats. With these foods in your mind's eye, you can readily see that you'll not starve yourself and yet attain your object.

What constitutes "effective competition" is an intensely practical matter. If, for instance, we are producing in this country certain commodities to the extent of \$100,000,000 a year and the tariff is such as to permit the importation of \$10,000,000 a year of similar commodities, to what extent should the tariff be lowered to make the competition "effective"? You know of course that milk, cheese, butter and cream are rich in fats. With these foods in your mind's eye, you can readily see that you'll not starve yourself and yet attain your object.

What constitutes "effective competition" is an intensely practical matter. If, for instance, we are producing in this country certain commodities to the extent of \$100,000,000 a year and the tariff is such as to permit the importation of \$10,000,000 a year of similar commodities, to what extent should the tariff be lowered to make the competition "effective"? Should we lower the tariff enough to permit the importation of such commodities to the value of \$45,000,000 more, thus giving the foreign producer an equal break in our market?

If that is what the Democrats mean by "effective competition," the American workman will know exactly what he is voting for if he votes the Democratic ticket. He will know that the Democrats propose to take away from him approximately half of his home market and give it to the foreign producer. He will know that the Democrats propose to throw out of employment approximately half of the people engaged in his industry in order that a correspondingly large number of persons may be given employment in a competing industry in Europe or Asia.

It is admitted by the New York World that the Democratic platform is lame in this respect. It is asserted by that paper that the Democratic nominee for president should elucidate the tariff plank. But a president does not make a tariff law. A tariff bill must originate in the

House of Representatives. The nominee for president cannot bind his party associates who are candidates for Congress. The platform being admittedly vague and a menace to American industry, the voter cannot wisely pursue any other course than support the party which had the intelligence and the frankness to tell just exactly where it stands on the tariff question—for protection to American labor and American capital.

Accordingly eggs and meat have been taken off the dietary of the rheumatic, or arthritic patient, as he is now called, and he has loaded himself up with starches to make up for this.

It has been learned lately that an excessive diet of starches—bread and vegetables—can derange the intestine, and the resultant product in the blood causes arthritis or rheumatism.

If you are afflicted with these painful joints and have had your meat and eggs cut off, and now find that your bread and vegetables are to be cut down, you will wonder what is left.

You will remember that the main food stuffs were meat and white of egg, starches and sugars, fats, salts and water.

It looks like a fat, salt and water diet.

And as a matter of fact, physicians and institutions using special work on these painful joint conditions, are now using a diet in which the fats take the place to a large extent of the meats and starches. The diet for the ordinary person in good health is about as follows: one part meat or eggs, two parts fats (butter or milk), and three parts starches.

This spread over the three meals of course.

This new diet for the rheumatic patient does not interfere with the meat and eggs, but cuts down the starches until they are about one-third of the amount taken by a normal person, and the fats are increased nearly four times.

With this idea in mind, and with that tendency to painful joints as a part of your make-up, it would then be good sense on your part to give

## THE ICE-BOX COMES IN FOR ITS SHARE OF MODERNIZING

For Health and Economy—Electrical Refrigeration—Irregularity of Temperature Is the Chief Cause of Food Spoilage In the Ice Box.

Intelligent buying of foodstuffs, as every housewife knows, is a very difficult task. It is next to impossible to purchase in small quantities and continue to live within the family budget. Yet, to purchase in larger quantities at less cost is hazardous, for the food is liable to spoil. The woman is bound to be late or irregular in her visits to the market. A delay of only a few hours may prove as fatal as though the woman had abandoned herself for as many days. To guard against such emergencies is practically impossible. To preserve foodstuffs for any length of time they must be kept at as nearly a uniform temperature as possible, something which, unfortunately, cannot be regulated with melting ice. In fact, science has proved that it is the irregularity of the temperature that spoils the food in the ordinary ice box. Hence, the woman whose family is small and who is using ice for refrigeration cannot save by buying in larger quantities. She is obliged to buy from day to day and pay accordingly.

**Relative Costs.**  
That housewives are seeking to improve upon the old method of refrigeration is quite evident from the number of invitations which women have received to speak at women's clubs upon the subject of electrical refrigeration. Recently, during an address before a home study club in New York, out of the hundred women who were present, 65 were found to be particularly interested in electrical refrigeration. They wanted

it but thought they could not afford it. Yet nearly every one of them said she spent on the average of from 50 cents to a dollar weekly on ice.

The relative cost of electrical refrigeration, it must be remembered, will vary according to the local cost of both ice and electricity. Also much will depend on the temperature of the room in which the refrigerator is placed and the amount of opening and shutting of the doors. But figuring at 60 cents for 100 pounds of ice and electricity at 10 cents a kilowatt hour the cost will be in favor of electrical refrigeration. Then add to this the cleanliness, sanitation, elimination of food spoilage and the saving by large purchases of foods and one cannot help realizing the great advantages of electrical refrigeration.

If the initial cost of the electrical refrigerator is all that deters you from possessing one, nearly all manufacturers and distributors of electrical appliances have made the purchase of these labor and money savers sufficiently easy that even the housewife with a very modest steady income can afford one. Today practically all of them may be purchased on the partial payment plan. The electrical refrigerator is really the only answer to cutting the cost of food stuffs.

**What Refrigeration at Home Really Means.**

Electrical refrigeration makes it unnecessary to shop oftener than once a week, when one may purchase in fairly large quantities. With proper management one need not serve the same things two days in succession. There are, however, dishes such as

stew or pot roast, which have the reputation of being far better tasting the second day after cooking than the first.

Soup is one of the things that can be made early in the week, strained and placed in the refrigerator and served later jellied, creamed or as a broth.

Electrical refrigeration means good-bye to the undependable ice-man.

It means no more spoiled food because of a too-warm refrigerator.

It means the economy of buying many meats at wholesale prices, for they can be stored in the supercold of the electric ice box indefinitely.

It means that salads, ice cream and sherbets can be made in the morning, and served fresh and crisp at night.

It means dairy ice cubes always ready for cooling drinks.

Above all, it means safeguarding the health of the family.

The electric refrigerator today can be had either complete in itself, cabinet and all, or the refrigerating unit may be fitted onto your own ice box. And the cost of operation is less than the ice bills of many families.

### Isles Bird Havens

Around the coast of Britain there are several islands chiefly populated by marine birds. The Faroes have been the winter resort of the elder duck for generations and probably for many centuries. The Skerries off the Anglesey coast are the sanctuary of the arctic tern and the beautiful roseate tern.

Holyhead Island is visited occasionally by the whooper swan, the somewhat rare tufted duck and the red-breasted merganser, says the Detroit News. Puffin Island, at the entrance to the Menai strait, is named after the birds that inhabit it.

### Petroleum Not New

Petroleum was known to exist in northern Pennsylvania more than eighty years ago, but no effort was made to commercialize its output in quantities until 1854.

### BANANA SHERBET

A Delicious and Inexpensive Frozen Dainty.

1½ cupfuls sugar 2 cupfuls orange juice  
1 cupful water 2 tablespoonfuls lemon juice  
6 medium sized bananas 1 egg white  
2 tablespoonfuls sugar

Boil the water and sugar together for five minutes. Cool thoroughly. Mash the bananas or press through a potato ricer. Add the orange and lemon juice to the banana pulp. Combine with the sugar syrup; pour into the freezer, and partially freeze. Then beat the egg-white until stiff, add the two tablespoonfuls of sugar and beat again. Fold into the sherbet and freeze about five minutes longer, or until stiff enough to serve. Serve garnished with diced oranges.

### Eliminating Waste in Electrical Housekeeping.

By Catherine Howard Stanley.

Many people take economy to mean deprivation. It is nothing of the sort. Economy means the elimination of waste—and elimination of waste is efficiency in its true sense. Electricity is the cheapest power any housekeeper can employ to do her lighting and relieve her of myriad of taxing household tasks, if she will employ it intelligently. The only fault, if indeed it is that, is its ready availability. Like water it is so available that we are inclined to let it flow. It means little, we feel, to let the electric cleaner run for the several minutes required to answer the door bell of telephone. Yet those two or three minutes added to others thus wasted throughout the month may cost you the price of two, three or four kilowatt hours, which would have operated any one of the electrical appliances for the same length of time doing really useful work.

### A Case in Point.

For example, electricity is wasted with no benefit to the washing machine when it is left running when the washing is completed or when it is empty. Likewise to overheat the iron or ironer results in needless expense. Yet these are everyday occurrences in many households.

A friend of mine told me recently of her efforts to solve the mystery of an electric bill that puzzled her. She was, she declared, certain the fault must be with the meter, the meter reader or that her new electric toaster and percolator which she had been using for a month were consuming too much electricity. I went to her home and upon ex-

amining her bill and meter found they were undoubtedly right. Also she insisted no lights had been left burning unnecessarily, nor had she been using more light than usual. Then without telling her why, I asked for coffee and toast for luncheon, as I wanted to find out how she used these two appliances.

I discovered that she started to heat her toaster fully fifteen minutes in advance of using it, and instead of pulling the plug out of the convenience outlet when she finished, she left the toaster heating while she ran back to the kitchen to get something she had forgotten. Altogether it took her twenty-five minutes to make five pieces of toast.

The process of making coffee was about the same. She attached the percolator when she first began to prepare her luncheon and it percolated all during the meal until we were ready for it. Altogether it took thirty-five minutes to make the coffee, where it should have taken only fifteen or twenty at the most. Where the coffee is not required until the end of a meal, the percolator need not be connected until the meal is half way through, because it started earlier it must be kept going to keep the coffee hot.

A month later she called to tell me that although she had used the toaster and percolator every day during the month, her bill had only been slightly larger than before she had purchased them. The reason was, of course, that she had learned to operate them properly. Close attention must be paid to these small savings if one desires to introduce into the home, system, economy and efficiency.

## CHEAPER CUTS OF MEATS COOKED ELECTRICALLY

As Appetizing as They are Inexpensive—Purchase Enough For Two Meals and Save Accordingly.

Round steak is a versatile piece of meat. Usually we think of it in a loaf or hamburger style, but the clever housewife does not order round steak chopped and she does not always use it thus. She buys as much as she will require for two meals and makes certain it is cut sufficiently thick for broiling. She then cuts off the amount needed for the first meal and puts the remainder into the refrigerator to await its fate the next day.

Round steak, if properly prepared, is as good broiled as better cuts, particularly when broiled under intense heat, preferably in the electric cooker. The cooker is specified because experience has taught that it will broil a steak evenly without charring it or permeating it with the odors foreign to the meat itself. Thus, all of the steak broiled in the electric cooker is done to any desired degree, rare, medium or well-done; all over at the same time, retaining its own luscious flavor. The menu for the first round steak meal might be:

Broiled Steak.  
Baked Potatoes.  
Buttered Fresh String Beans.  
Tomato Jelly Salad.  
Strawberry Ice.  
Iced Coffee.

The broiler should be heated sufficiently to sear the steak quickly and thus help it retain its juices. Before broiling it, however, pound a tablespoon of salt and several drops of lemon juice into the steak, which gives it a very delicious flavor.

The string beans may be boiled and the potatoes baked in the electric cooker while the broiler is being preheated for the steak and during the broiling. Very little water is necessary to boil the beans, as this does not boil away in cooking in the electric cooker.

**Tomato Jelly Salad.**  
This recipe calls for two cupfuls of tomato puree, two tablespoonfuls gelatin, one half cupful cold water, one teaspoonful paprika, three tablespoonfuls vinegar, one teaspoonful salt, and one tablespoonful sugar.

Soak gelatin in cold water one-half hour, meanwhile mix the tomato puree with the seasoning and bring to a boil, add the gelatin to the tomato mixture and stir until dissolved. Set in cold place to become firm. Serve on lettuce with mayonnaise.

bring to a boil, add the gelatin to the tomato mixture and stir until dissolved. Set in cold place to become firm. Serve on lettuce with mayonnaise.

**Strawberry Ice.**  
For three or four people hull and wash one quart of strawberries and put them through the potato ricer. To this add three-quarters of a cupful of sugar, juice of one lemon and half a cupful of cold water. Stir thoroughly and put into the electric ice cream freezer or refrigerator.

**The Next Day.**  
The next day put the remainder of the round steak through your meat chopper, or, if you have an electric utility motor, use that to grind the meat, together with two small onions and one-quarter of a bell pepper. To this add a little paprika, salt and pepper to taste and one egg. Work this through the meat thoroughly. Remove the shell from a hard-boiled egg; then form the meat around this into a loaf and bake in a preheated electric oven, allowing from seven to ten minutes to the pound, depending of course, upon the size of the loaf.

With this serve a tomato sauce, which can easily be made from canned tomatoes. Cut the tomatoes with a fork into fairly small pieces, heat them in a saucepan, add half a cupful of mixed flour and milk or cream if you have it, let it come to a quick boil and then remove it and serve with the meat loaf.

**How China Is Colored**  
The coloring of the designs seen on china is very different from the coloring originally applied. To fix the colors the articles have to be baked as many as eight or nine times, and at each baking the colors alter a little. A cup to be pink, black and gold in the finished state, for instance, would be painted brown, blue and a dull kind of brown first, respectively.

**Fairies Fear Mountain Ash**  
Among peoples who live in mountainous regions there is a belief that the mountain ash is endowed with a special power to ward off fairy spells. Fairies are said to be in dread of it.

## Ancient Appliances Perfected For Modern Use

It is a far cry from the rounded water-worn stone first used to smooth linen after it was washed to the compact and efficient electric iron of today, but the pedigree of the latter can be traced without a fault to its primitive ancestor.

The round stone, still in use in the Orkney Islands, was replaced by the black glass linen-smoother of the Scotch of the 10th century, who got it from the Vikings. This instrument was shaped like an inverted mushroom, and was no more than an effort to make the rounded stone convenient by giving it a handle.

Two hundred years later the French began to use metal irons, shaped like a tailor's goose, but smaller, and made to hold charcoal or a red-hot iron bar. Following them came the simple flat-iron of a generation ago, heated slowly on the stove, a battery of them being necessary for continuous work.

From these has been perfected the modern electric iron, which is heated in two minutes and which remains hot as long as the current is turned on. It is estimated that to iron a sheet with flat-irons required four changes of irons and eighteen minutes of time; whereas with an electric iron the same work is done in ten minutes.

## Licenses for Upstate Drivers

Not Required Until October 1, and Applicants are Requested by Motor Vehicle Bureau To Withhold Applications Until the Middle of August.

Upstate automobile drivers who will require licenses October first are asked in the interest of sound administration and efficient organization to withhold applications for these licenses until the middle of August, in a letter sent today to all upstate county clerks, signed by Deputy Chief Frank J. Wenzel of the Albany office of the motor vehicle bureau. The letter follows:

July 10, 1924.

"Dear Sir: Judging from the requests for information and applications received from (a) county clerks, and (b) those desiring operator's licenses, causing anxiety, concern and apprehension on the part of many motorists."

"The new statute became effective on July first but one need not have a license to drive in counties outside of New York City until October first. In other words, one has three months in which to obtain his license. No reason is seen why the interests of applicants for licenses will not be properly served if they refrain from making application until the middle of August."

"Mr. Harnett, the new motor vehicle commissioner, was appointed on June thirtieth. He assumed the duties of his position on July first. Naturally, there was much work to be done. The form of application blank had to be prepared; the style and form of license had to be decided upon; the procedure to be followed had to be planned and worked out. In addition offices must be rented, furniture and equipment secured, and a force of inspectors and employees obtained and trained for without training they would be inefficient. He is hoping and expecting to lay those plans before county clerks at their Mayville convention on July twenty-fifth."

"Will you not advise those who make inquiries that they will aid you and convenience the motor vehicle bureau if they refrain from making application for licenses until after August first; that by that time you expect to have full instructions and be prepared to serve them promptly. It is also suggested that you cause this information to be disseminated through motor vehicle organizations and otherwise in your county to the end that interested persons may not be unduly concerned and that they may understand we are making haste as rapidly as is consistent with sound administration and efficient organization."

"In case any applicant is urgently in need of a license for any reason not conceivable by the writer, his case will be handled in the manner stated in Mr. Harnett's recent telegram to you."

Very truly yours,  
"MOTOR VEHICLE BUREAU"  
"FRANK J. WENZEL,"  
"Deputy Chief."

SOUTH RONDOUT, July 11.—Mr. Poland of the Anti-Social League gave an interesting talk in the church on Sunday evening.

Miss Antoinette Hyde of New York spent the Fourth with her parents, Mr. and Mrs. Liberty Hyde.

Joseph Snyder, pilot on the Albany, spent a few days with his wife.

Florence McDonald is visiting her sister, Mrs. Clara Evans, at Poughkeepsie.

The Misses Ida and Margaret Maurer returned home after visiting friends in New York.

Frederick Fox of Hoboken spent the Fourth with his sister, Mrs. Charles Becker.

Edna Wilson of New York motored from Haines Falls with Mr. and Mrs. Edwin Haines on Sunday and called on her relatives here.

Mrs. Andrew Anderson returned home Tuesday from the Kingston City Hospital.

Mrs. Fred Becker and son, Walter, are visiting her people in Jersey City.

Mrs. Frank O'Neil and son Robert, of Hoboken, are spending some time with her mother, Mrs. Barbara Lauer.

Mr. and Mrs. John Biel of New York spent the Fourth with her parents, Mr. and Mrs. Ira Hyde.

Oscar Lefner of New York spent Sunday with his family.

Little Allen Evans has returned to his home in Poughkeepsie after spending some time with his grandparents, Mr. and Mrs. Charles McDonald.

Russell Maurer of New York has been spending some time with his family.

Dr. and Mrs. Conda Lawing and children have returned to their home in West New York after spending the Fourth and the week end with her mother, Mrs. Kathryn Clair.

Mr. and Mrs. Fred Beach of Flatbush, Brooklyn, spent the Fourth with Mr. and Mrs. Mat Clair. Their son, Curtis, returned home with them to spend some time.

Little Ruth Terpening is spending some time with her grandparents, Mr. and Mrs. Knud Olsen.

Mrs. Peter Ahl and children of Kingston spent Sunday with her parents, Mr. and Mrs. John Schirber.

Helen Stoudt has been confined to her home with the quincy.

Mr. and Mrs. Clarence Hyde of Kingston spent Sunday with his parents, Mr. and Mrs. Liberty Hyde.

Harriet Olsen has returned home after spending her vacation at Montreal. Thousand Islands and other places of interest along the great lakes.

Elizabeth Cole of New York spent the Fourth at the home of her parents, Mr. and Mrs. Edwin Cole.

Mr. and Mrs. Edwin Dunn of Hoboken spent the Fourth with his parents, Mr. and Mrs. George Dunn.

## 600 U. S. Soldiers Sail for Panama

The U. S. Army transport "St. Mihiel" sailed at noon today from the Army Base, Brooklyn, with approximately 600 soldiers destined for duty in Panama, Hawaii, Philippine Islands and China. The contingent is composed of recruits from all states east of the Mississippi river. The first stop will be Colon, Panama. Some of the soldiers will not reach their destinations until the latter part of August, following 45 days of continuous ocean travel.

## CHIC AND SMART THINGS IN NURSERY WARDROBES

(By Eleanor Gunn.)

Brevity is not only the soul of wit, but the essence of chic, when it comes to skirts for the youngster. Simple lines and fine workmanship continue to be the goal of designers of such clothes, the little daughters of the rich being conspicuous usually by clothes which are distinguished by these features. Left side trimmings and interesting combinations of color and material are prominent in imports of children's clothes just now.

Party frocks in pastel shades and play or sports frocks in bright tones continue to be the accepted and approved features. Waistlines have fallen, if possible, lower than before, or else are omitted entirely; but when a girl echoes the sub deb age, it is going to be impossible to expect her to resist the brilliantly striped polo belts which have suddenly sprung up like the proverbial mushroom, and are discovered about the slender waists and hips of sportswear school girls.

Sleeveless dresses are ageless. They are chosen for the tiny tot and for her grandmother, just as sleeves which end half way to the elbow are approved for the seven ages of womanhood. Diminutive pearl buttons are among the accepted trappings and even tiny girls have assumed a tailored air, many of their dresses being restrained in decoration and replicas of mother's tailored or shirtwaist frocks.

Appliques and bands, as indicated, of contrasting color, are another seasonable and charming suggestion for juvenile wear.

(Copyright, 1924, Fairchild.)

tored to Saratoga Springs on the Fourth.

Russell Maurer has returned to New York after spending some time with his family.

John Durkin and son John of Jersey City are spending two weeks with his mother, Mrs. Julia Malnes.

Mr. and Mrs. Henry Osborn and son Hewitt of Ulster Park spent Sunday with her parents, Mr. and Mrs. Fred Kellerman.

Mrs. Austin Grimes of New York has been spending some time with his family.

Leon Blitzhover of Hoboken is spending some time with his grandparents, Mr. and Mrs. B. Blitzhover.

I can eat anything. ROYAL DIGESTO takes care of indigestion. On sale at Connelly Drug Co., Kingston Central Pharmacy, Ten Broeck's Drug Store, McBride Drug Stores.—Advertisement.

## TODAY WE CELEBRATE

THE G. A. R.

The first convention of the Grand Army of the Republic was held fifty-eight years ago today at Springfield, Ill., and to Dr. B. F. Stephenson of that city belongs the honor of first suggesting its formation as an organization of veterans. The doctor has been a surgeon in a volunteer regiment and was convinced that such an organization of the returned vets for mutual benefit was highly desirable. A ritual was drafted under his supervision and the first post instituted at Decatur, Ill.

## JOAN LASHFORD.

Was the daughter of Elizabeth Worne by a former husband, and was burned as a heretic during the reign of Queen Mary, 1556, being one of the many young women who suffered this fate at about that time. Joan Lashford was about 20 years old when she sealed her faith with her blood and died the death of a martyr.

## UNIVERSITY OF PENNSYLVANIA.

The first charter of the educational institution which developed into the University of Pennsylvania, was granted 171 years ago tomorrow, July 13, 1753, under the name of the "Trustees of the Academy and Charitable School in the Province of Pennsylvania."

Benjamin Franklin was the founder of the school, which was opened in a little building on Fourth street, near Arch.

Franklin obtained \$2,000 by subscription and organized a board of trustees. In 1752 a second charter was obtained and the name changed to "The College and Academy of Philadelphia."

The first class was graduated in 1777. An endowment of \$30,000 was raised in England in 1762, and with this and an added sum obtained in a lottery, another building was constructed for the accommodation of students for the West Indies. The Medical School was opened in 1765. During the Revolution, the Provost, Dr. William Smith, was suspected of loyalty to Great Britain, and imprisoned, but he continued to hear recitations from his cell. In 1779 the college charter was revoked and its franchises were conferred upon the "University of the State of Pennsylvania." A decade later the old faculty and trustees were reinstated, and in 1791, the institution assumed the title of "University of Pennsylvania."

## Mercury Forced From Ore by Distillation

Probably the largest exposed deposit of cinnabar, or quicksilver, ore is that forming the mountain from which the town of Black Butte, Ore., derives its name. There a vein 400 feet wide has been opened for more than a mile along the mountain at a depth of 1,900 feet below the crest. In Europe the chief mines are at Almaden, in Spain, and at Idria, a town 25 miles from Trieste.

The process of obtaining the mercury is called distillation. After being crushed the ore is subjected to intense heat, 1,200 degrees Fahrenheit. When the ore has attained the temperature of 650 degrees, the mercury is driven off in the form of vapor. This vapor is passed into large wooden or brick chambers called "condensers" which are surrounded by water jackets and other devices designed to reduce the temperature. In these chambers the vapor is condensed, the quicksilver assuming a metallic form and being deposited in fine globules on the walls and floors. These globules, as they increase in size, merge and run out in troughs ready to be marketed. The product is shipped in wrought-iron flasks weighing fourteen pounds each and holding seventy-six and one-half pounds of the metal, for which the dealer contracts at the market price.

## NOTICE OF BOND SALE.

NOTICE IS HEREBY GIVEN, that the undersigned, Supervisor of the Town of Woodstock, County of Ulster and State of New York, will sell at public auction to the highest bidder, at the front door of the County Court House, in the City of Kingston, on the 15th day of July, 1924, at twelve o'clock noon, bonds of the following denominations and maturing on the following date, to-wit:

Six bonds, numbered from one to six consecutively, each of which said bonds shall be of the par value of \$333.33, and shall fall due on the first day of March in each of the years 1925, 1926, 1927, 1928, 1929, and 1930, and five of which said bonds shall be of the par value of \$1,000 each, and shall fall due on the first day of March in each of the years 1925, 1926, 1927, 1928, 1929, and 1930, both inclusive.

Said bonds are registered bonds, bear interest at the rate of five per centum per annum, and are issued pursuant to the provisions of Section 320-A of the Highway Law, Sections 6, 7, 8, 9 and 10 of the General Municipal Law, and pursuant to an Act adopted by the Board of Supervisors on the 19th day of May, 1924.

Said bonds are issued for the purpose of paying the town's proportionate share of the cost of construction of County Highways under the provisions of Section 320-A of the Highway Law.

Said bonds cannot be sold for less than par.

Terms of sale are to be as follows: Twenty-five per cent in cash at the time of sale, and the balance within ten days from the date of the sale, at which time the bonds will be delivered.

Written proposals may be submitted in accordance with the terms of sale, and the bids for the bonds shall be in lump sum only, and not on a percentage basis.

The bonds will be first offered separately, and then in block. In the event the aggregate of the bids for the separate bonds exceeds the highest block bid, the bonds will be struck down to the highest bidder for the individual bonds, but in the event the highest bid for the bonds in block equals or exceeds the aggregate of the bids for the single bonds, the bonds will be struck off to the highest bidder.

No bids shall be binding upon the town until the bonds have been offered for sale both ways and actually struck off to a purchaser.

The bonds will bear date July 15th, 1924.

The town will not be liable to the purchaser or to any other person for attorney's fees in relation to the bonds, or for investigating the validity thereof.

Dated, July 8th, 1924.

PHILIP SCHANTZ,  
Supervisor of the Town of Lloyd.

NOTICE OF BOND SALE.

Four bonds, numbered from one to four consecutively, each of which said bonds shall be of the par value of \$1,000, and shall fall due on the first day of March in each of the years 1925, 1926, 1927, and 1928, both inclusive.

Said bonds are registered bonds, bear interest at the rate of five per centum per annum, and are issued pursuant to the provisions of Section 320-A of the Highway Law, Sections 6, 7, 8, 9 and 10 of the General Municipal Law, and pursuant to an Act adopted by the Board of Supervisors on the 19th day of May, 1924.

Said bonds are issued for the purpose of paying the town's proportionate share of the cost of construction of County Highways under the provisions of Section 320-A of the Highway Law.

Said bonds cannot be sold for less than par.

Terms of sale are to be as follows: Twenty-five per cent in cash at the time of sale, and the balance within ten days from the date of the sale, at which time the bonds will be delivered.

Written proposals may be submitted in accordance with the terms of sale, and the bids for the bonds shall be in lump sum only, and not on a percentage basis.

The bonds will be first offered separately, and then in block. In the event the aggregate of the bids for the separate bonds exceeds the highest block bid, the bonds will be struck down to the highest bidder for the individual bonds, but in the event the highest bid for the bonds in block equals or exceeds the aggregate of the bids for the single bonds, the bonds will be struck off to the highest bidder.

No bids shall be binding upon the town until the bonds have been offered for sale both ways and actually struck off to a purchaser.

The bonds will bear date July 15th, 1924.

The town will not be liable to the purchaser or to any other person for attorney's fees in relation to the bonds, or for investigating the validity thereof.

Dated, July 8th, 1924.

PHILIP SCHANTZ,  
Supervisor of the Town of Lloyd.

NOTICE OF BOND SALE.

NOTICE IS HEREBY GIVEN, that the undersigned, Supervisor of the Town of Woodstock, County of Ulster and State of New York, will sell at public auction to the highest bidder, at the front door of the County Court House, in the City of Kingston, on the 15th day of July, 1924, at twelve o'clock noon, bonds of the following denominations and maturing on the following date, to-wit:

Four bonds, numbered from one to four consecutively, each of which said bonds shall be of the par value of \$1,000, and shall fall due on the first day of March in each of the years 1925, 1926, 1927, and 1928, both inclusive.

Said bonds are registered bonds, bear interest at the rate of five per centum per annum, and are issued pursuant to the provisions of Section 320-A of the Highway Law, Sections 6, 7, 8, 9 and 10 of the General Municipal Law, and pursuant to an Act adopted by the Board of Supervisors on the 19th day of May, 1924.

Said bonds are issued for the purpose of paying the town's proportionate share of the cost of construction of County Highways under the provisions of Section 320-A of the Highway Law.

## MEN AND WOMEN IN NEWS OF THE DAY.

Above: CHARLES E. HUGHES & MRS. BETSY C. JUDD.  
Below: A. D. HOUGHTON & A. D. GWATHMEY, JR.

Charles Evans Hughes, Secretary of State, has been unanimously elected President of the American Bar Association, in session in Philadelphia. A. D. Houghton, American Ambassador to Germany, who returned to Washington for a conference with President Coolidge, has been obliged to hasten back to Berlin because of chaotic conditions in Germany. Mrs. Archibald B. Gwathmey, whose multi-millionaire husband, the work and Texas cotton king, recently secured a divorce in Texas, is suing him in New York, declaring the Texas decree void. Mrs. Betsy Judd is a correspondent. The New York courts are finding that Mr. Gwathmey's confessed love for Mrs. Judd is purely platonic. Now it is revealed that Gwathmey and Mrs. Judd were secretly married on July 4.

## DEMOCRATIC CANDIDATES CONFER.

JOHN W. DAVIS & CHARLES W. BRYAN.

John W. Davis, of West Virginia and New York, is shown in his first meeting in New York City, with Governor Charles W. Bryan, of New York, picked by the Democratic National Convention to be his running mate in the Presidential campaign.

## He Had Lost Faith

At dinner a little girl became highly excited at discovering the wishbone in the chicken on her plate. At this her little brother remarked skeptically: "They're stupid things. I've had three wishbones and daddy hasn't got a motor-car yet!"

## Historic Babylon

The country anciently known as Babylon or Babilonia constitutes in part what is known as Mesopotamia. The distance from Babylon to Jerusalem was between 500 and 700 miles. The buried city of Nineveh was situated near the city of Babylon.

## Growers Prefer Rail Shipments

Delaware County Cauliflower Producers Decide to Reach New York Market by Railroad Instead of Motor Trucks.

About one hundred cauliflower growers in the vicinity of Margaretville met at that place on Wednesday night with representatives of railroads and others to discuss transportation of cauliflower, which is raised in large quantities, to the New York market. The meeting was preceded by visits to various growers in the vicinity.

After full discussion, all except one or two growers indicated by a standing vote their intention to ship their product by railroad instead of motor truck, and a committee was appointed to arrange for shipments by freight instead of express, which will mean a saving of 15 to 25 cents per hundred pounds to the producers.

Speakers included R. Q. Smith, Delaware County Farm Bureau agent; A. C. Martin, a New York commission merchant; Richard Hopper, division freight agent of the New York Central lines; R. Paikewich, agricultural agent of the New York Central; Thomas W. Fleming, traffic manager of the Ulster & Delaware Railroad; and Harry Miller, of the Delaware & Northern Railroad.

## THE OFFICE CAT

By Jontie

## So He Died Young.

Customer—I would like to see a pair of shoes that would fit my feet.  
Salesman—So would I.

Up at our boarding house there are two children, a boy and a girl. The boy is the living photograph of his father, and the girl is the very phonograph of her mother.

## He Was Particular.

School Teacher (to boys)—Now, all who desire to go to heaven when they die, stand up!

Teacher—Why, Jimmy? Don't you want to go there, too?  
Jimmy—Yes, Ma'am, but not if that bunch is going.

The hardest thing about being a professional politician is keeping excited.

Jim—They're not delivering any more mail to Cleveland.

Jam—Why's that?  
Jim—He's dead.

A boy's idea of a hypocrite is another boy who runs to school every morning.

Q. What can I do to avoid falling hair?

A. Jump out of the way.

The average man's idea of interior decoration is a square meal.

A man recently sent a bathtub home to his family in the country. The next week he received a letter asking him when the ears were coming.

An optimist is one who can enjoy his car without thinking of the mortgage.

Mankind is no longer safe. Cleveland woman dry agent arrested a man while he was taking a bath.

## Meet 'Em Every Day.

Don't you find it hard these times to meet expenses?

Hard? Man alive! I meet expenses at every turn.

Mother to "Sister's gentleman friend"—How did you scratch your face?

S. G. F.—A cat scratched me.  
Little Brother—Sister, he called you a cat.

The old fashioned woman who used to think of nothing but her house now has her bobbed hair to look after.

One advantage of a radio concert is that you can smoke, whistle, or drum with your feet without being annoyed by the usher.

As to Mary Garden signing a contract to play a wordless role in a new play, she ought to do well. It wasn't words that made Mary famous.

The honeymoon is over when she asks him if he loves her and he answers "Uh huh."

(Copyright, 1924, Office Cat Syndicate.)

## Didn't Make a Hit

I was just a youngster, but had been hearing my parents tease my older brother about getting married, so I felt I knew all about it. So one day, while I was playing with a little girl I admired, I said: "Let's get married when brother does." At that she ran home, saying, "I'll tell mamma on you." I never repeated it to her.—Chicago Journal.

# The Door Is Open--- Here Is The News!

## The "Key To Thrift" [Pictured Above]

—will be on display in one of Macy's Broadway windows beginning Monday morning. It is the key with which Rowland H. Macy opened his first store in Haverhill, Mass., in 1851.

THIS brass Key made retail history. Rowland H. Macy did not come to New York until 1858; but in his little Haverhill store he formulated the principles which were to launch a new era in merchandising and guide the Greater Macy's of today. Those principles are: cash sales only, lowest prices, one price for all, economy in operation.

When the Key was discovered last year in Haverhill, the event was celebrated with a great week of sales at Macy's. Next week, to celebrate the first anniversary of the finding of the Key, another series of exceptional Key-to-Thrift Sales will be held.

Throughout the store, departments have long been preparing for this event. Some have made special purchases and marked prices considerably below the usual figures. Others have reduced prices on merchandise already in stock.

Many of the sales offerings will not be advertised for lack of space, but in the store each sale will be identified by a special counter card bearing the "Key to Thrift"—your token of extraordinary savings.

Let the "Key to Thrift" guide you next week. Every day this store sells good merchandise for at least 6% less than the other stores. But next week, the savings will be far greater. Watch the newspapers for details.

## Key-to-Thrift Sales Start Monday July 14th And Continue All Week

Sloan, late of East Kingston, Town of Ulster, County of Ulster, deceased, testate, to present the same with the vouchers in support thereof to the undersigned, Frank R. Mooney, Executor of the estate of said deceased, at the office of Chris J. Flanagan, Attorney, 31 Broadway, Kingston, N. Y., on or before the 1st day of November, 1924.

## Consumption of Coffee Increases

Coffee consumption in the United States for the crop year, July 1, 1923, to June 30, 1924, has reached the highest total on record—10,758,080 bags, as compared with 9,660,541 bags for the preceding twelve months, an increase of 1,097,539 bags. Estimated in pounds instead of bags, these figures become 1,463,272,225 pounds, as compared to 1,227,596,950 pounds for the previous crop year.

Excluding what coffee may have been taken from American warehouses for re-exportation, the per capita consumption in this country would be 13.30 pounds. As the per capita consumption in this country for the crop year 1922-1923 was 11.63 pounds, it is evident that the beverage is showing a steady growth in popularity. The new consumption figure shows an increase of 14.3 per cent over the preceding crop year.

This growth in coffee drinking is more striking in view of the steady increase in the price of coffee since the beginning of the year. Damage to stocks in storage and to the net crop prospect in Brazil, from where this country gets 70 per cent of its coffee, has brought about a scarcity in the world's visible supply. This is evidenced by the increasing premiums which Americans are paying for the better grades.

In the face of higher prices, the consumption in the United States has climbed rapidly, keeping pace with the increase during the periods when the coffee market was stable. The present per capita consumption of 13.30 pounds is an amazing increase in two years' time, over the 11.04 pounds per capita of 1922.

### ELLENVILLE.

Ellenville, July 12—Mayor H. W. Coons and family have returned from a motor trip to Washington.

Miss Pauline Taylor spent last week end at her home in Ellenville.

Mr. and Mrs. John H. Divine have returned from a trip to the Adirondacks, where they spent several delightful days camping with Dr. and Mrs. John W. Gulick. Mr. and Mrs. Divine and family with Mrs. Divine's mother, Mrs. Taylor, are now at their summer home at The Cape.

The Scoresby House and Hook and Ladder Company have postponed their lawn party which will take place on Tuesday, July 23, instead of as previously announced.

The M. E. Church lawn party will be held on Thursday, July 17, afternoon and evening, on the church lawn. Supper from 5 to 8 o'clock. Menu: Cold boiled ham, escalloped potatoes, egg salad, tomatoes on lettuce, rolls, pot cheese with peppers, cake and coffee. All kinds of fancy articles, aprons, ice cream and home made candy will be on sale. Everybody welcome. If stormy the supper and sale will be held in the church parlors.

George W. Eckert of Bridgeport, Conn., accompanied by his brother-in-law, James Vivian, spent part of last week in Ellenville. Mr. Eckert visited with his sister, Mrs. George W. Warner, and Mr. Vivian with his brother-in-law, Thomas Yarrow.

Dr. Frank S. Derby is spending several days in New York city.

Lieut. Elmer E. Count sailed Wednesday, July 9, for Paris where he will meet his father, the Rev. E. E. Count, for a trip to Sofia. He expects to remain abroad until September 1st.

Miss Mildred E. Canaan of New York spent the holiday with her parents in Ellenville.

Mr. and Mrs. M. S. Vanderlyn and son of Liberty street expect to leave next week to spend some time on the sound shore near Oyster Bay, L. I., where they have engaged a cottage.

Supt. E. E. Hoemer and family left Thursday to spend the rest of the summer at The Cape.

### HIGH WOODS.

High Woods, July 11.—Mrs. C. Vredenburg and daughter Lillian, came last week to spend a few weeks in their summer home. A birthday party was given to Mrs. Vredenburg July 4th by her daughters. Those present were Mr. and Mrs. Warren Farrell, Mr. and Mrs. Albert Higley, Mr. and Mrs. Harvey Cooper, Mr. and Mrs. C. Glezer and daughter, Mr. and Mrs. C. Vredenburg. A large birthday cake, the gift of her daughter, Mrs. A. Higley, was decorated in the national colors, with candles to match. The merry party gathered around the table on the lawn to partake of the "goodies."

Mrs. Ella Y. Longendyke of Kingston, spent the week-end at her brother's, S. V. York. Mrs. York is still sick.

Charles Steele's family came last week to their summer home here for the summer months.

Mr. and Mrs. Alex Felten entertained her brother, William Elgnor and wife of West Saugerties, also her niece, husband and boy of Saugerties Sunday.

### ANNA GASOOL AWARDED CORNELL SCHOLARSHIP.

Miss Anna Gasool of 9 Main street has been awarded a state tuition paying scholarship at Cornell University as the result of the competitive examination held on Saturday, July 5. Announcements of the awards throughout the counties of the state were announced today by the state department of education.

### Name Came From Italy

The name "Tivoli" as applied to theaters at the present time is undoubtedly connected with Tivoli, an ancient town of Italy, which was a well-known pleasure resort near Rome. The name of the ancient city was pronounced Tee-vo-lee. The pronunciation in the United States, however, as of the town of this name in New York, is Tiv-oh.

## PAVED ROADS SOLVE SHIPPING PROBLEMS

Motor Truck Loaded With Cattle for Market.

Transporting live stock to the market is much less of a problem than it used to be, now that the country is building extensive systems of paved roads. Adequate paved roads enable the heavy use of motortrucks at all seasons and under all conditions of weather, and by use of these trucks live stock can be hauled to market quickly and economically.

### All Markets Benefit.

Virtually all the important live stock markets of the country—Chicago, Kansas City, Indianapolis, Omaha, Sioux City, St. Joseph, Mo., and South St. Paul—now benefit greatly by this method of shipping animals. The Indianapolis stockyards, in the supplying of which this method of shipment is used to the greatest extent, have received as many as 6,500 head of stock a day by motortruck.

Many stock raisers, who do not ship all the way by motortruck, but depend on trains to carry the stock part of the way, have found that the motortruck is the most satisfactory way of getting the stock to the train. The animals reach the market in much better condition than they would if they were driven many miles to a railroad for loading. This method also saves a great deal of time.

### Valuable for Hogs.

In the shipment of hogs the motortruck method is especially valuable in hot weather, for many hogs die of heat when shipped long distances by train in the summer.

With good concrete roads, equally good at all times, the farmer may make rapid shipments at the time when he can get the price for his stock.

## WATCH STEERING GEAR CAREFULLY

Merely Necessary to Keep Joints Well Greased to Operate Properly.

(By ERWIN GREER, President Greer College of Automotive Engineering, Chicago.)

According to automobile accidents headlined in the country's newspapers, the steering gear of every automobile should be painted a horrible bloody red.

But are the newspapers right? Does the steering gear really go wrong and cause two-thirds of the motorcar accidents? If it doesn't why should it be made the goat so generally?

Yet here we are scaring our motor- ing friends into the belief that they can never tell when the steering gear will go wrong, giving the manufacturers a black eye, and shirking our own responsibilities. But between you and me the thing is getting to be a joke, because when we blame the steering gear as the cause of our accident, people are likely to glance at one another sideways and give a knowing wink. And they are the fellows who watch their steering gears and inspect them carefully. Then again they watch their driving more and do not turn the wheel wrong when the steering gear is doing its work properly. Hence it is easily seen why some of us are willing to blame the steering gear—in other words, to pass the buck.

### Keep Joints Well Greased.

To keep the steering gear operating properly, it is merely necessary to keep the joints well packed with grease, or graphite and grease mixed half and half. The housing which holds the reduction gears at the bottom of the steering column should be packed with grease at least three times a year. The ball joints at one end of the drag link must be kept greased because the lubricant leaks away from them rapidly, no cover being provided. These require frequent attention.

The ends of the tie rods are usually fitted with bolts and these, too, must be kept well greased. The steering knuckle pins also need regular attention. Always keep in mind that the various steering units are always in constant motion, that every vibration produces motion in the steering column. Thus the need for lubrication is very evident.

### Cause of Hard Steering.

Does your car steer hard? Then here is the reason: The knuckle pins, or king pins, have become dry resulting in a certain amount of binding. Hard steering is the result. Oil these every day, or every two weeks if graphite is used.

Don't adjust the steering system to compensate for wear unless you are positive of the location of the trouble. If wear occurs in the knuckle pins, it is useless to compensate for it by adjusting the steering gears. If the drag link is bent it naturally must be straightened, for this causes stiff steering. There is an adjustment nut to take up wear in the reduction gears, and this is right above the gear housing at the bottom of the steering post.

Your instruction book will illustrate exactly what parts are included in the steering gear of your particular car. Study it and proceed according to its advice.

### Ancient American Town

Alexandria, Va., a thriving village when Washington was a wilderness, was named for John Alexander, who purchased the land on which it stands from a royal patent in 1683. The town was incorporated in 1743.

## Duty of All Owners to Keep Bolts Tight

Every automobile owner should apply a wrench to every important nut and bolt on his car at least once a month. Nuts held by cotter pins may be ignored, but those held by loose washers should be tried with a wrench. A loose part may easily wreck a motor car and cause loss of life.

Many sermons are preached at the motorist on the subject of proper lubrication. There is one part of the car that should be kept properly lubricated regardless of what may happen. This is the steering column. This unit is most vital of all to the safety of the driver and the passengers. It is more than important—it is essential—that the steering gear be kept properly oiled all the time.

## Modern Way of Carrying Live Stock to Market

Here's the way the modern English farmer carries live stock to market. This is a motorcycle with the customary sidecar removed and replaced with a crated pen.

## How Stone Bruise Will Affect Automobile Tire

As a matter of fact, the term "stone bruise" is a mere figure of speech and should not be taken too literally. Tire people use the term perhaps too freely in referring to all those injuries that occur upon the surface of the casing and do the real damage to the inner part of the carcass. Rupture by shock would be a far better term and probably would be far better understood in all sections of the country. A "stone bruise," or rupture by shock can be caused by the tire hitting a stone or other obstruction in the road when traveling at a fair rate of speed. Or it may be caused by the casing coming in more or less violent contact with a garage door, a railroad track, a rut, or, in fact, any one of a thousand objects with which our roads are littered, either by the action of nature or by the intent or the carelessness of man. How often have you seen a man place a stone behind the rear wheel of a car stalled upon a hill until he could make his motor behave or until he could effect a temporary repair. However, when he started off he could not take the stone with him nor could he run back and kick it aside. The stone is left there to bump the tire of the following car—H. W. Slauson, in Leslie's.

## YEAST IS SALVATION OF GROWING CHICKS.

"The baby chicks may be smart little fellows from strong parent stock," reads a government bulletin on poultry raising. "And they may have been brooded carefully for the first two or three weeks, but unless they receive proper care and management during their later growing period they will not develop properly, and many of them will be lost by sickness or disease."

Realization of this fact has led to recent widespread experimentation in the feeding of growing chicks. With the aim of "uniform, continuous growth from hatching time to maturity," as a popular authority puts it, investigators have successfully worked out very effective feeding formulas.

In these new formulas, yeast, a relatively new element in poultry rations, has an important place. And the benefits achieved by adding it to the feed for baby chicks

# Standard Six

In the homes—on the streets—in stores and offices everybody is talking about the new Buick Six—the Six that sets a new standard of quality and price. Throngs of people are streaming into Buick salesrooms to see it.

## See it for Yourself

### SHAKESPEAREAN PLAYS AT MAVERICK TUESDAY

The Percival Vivian players, who have successfully two Shakespearean plays last season in the Maverick Open-Air Theater, will be here on Tuesday, July 15. If rainy, will be held the next fair day. The show will be given afternoon and evening 5 o'clock and 9, daylight saving time. The plays will be "The Taming of the Shrew" and "A Midsummer Night's Dream." The Maverick grounds will be free for the camp fire picnic between the plays. A dance will be held in the hall after 10.30.

### Even That

A casualty insurance company that had required some additional evidence to support a claim recently received a letter from the widow of the insured which ended: "I have so much trouble getting my money that I sometimes wonder if I wish my husband were not dead."—The Continent.

Renting garages is easy as pie; Just phone an ad—you'll get a reply.

**PHONE A WANTAD**

## World Going Bad, Says Evangelist

By Telegraph to The Freeman.  
Cleveland, July 12.—Christianity is declining, church pews are empty and the world is going to the bad generally because of church collections, the Rev. George Hermann Lawson, "prayer bride evangelist" conducting services here, declared today.

Lawson, preaching in New York a year ago, prayed for a wife. As a result of his prayer, Miss Ella Hedell, who is assisting him in evangelistic work, became Mrs. Lawson. He will speak tonight on "Modern Sodom and Gomorrah." The hat will not be passed.

Meanwhile he is supporting himself and prayer-bride at his trade of decorator.

## New York Produce Market

Wheat—Firm. December, 120 1/2; May, 125 1/2; July, 118; September, 118; spot No. 2 red winter, 133 1/2; c. i. f. N. Y. export basis, and 131 1/2, f. o. b. to arrive.

Corn—Easier. No. 2 yellow new, 121 1/2; No. 2 mixed, 117 1/2, c. i. f. New York 10 days' shipment.

Oats—Steady. Fancy white clipped, 63 @ 70; ordinary white clipped, 65 @ 67; No. 1, nominal; No. 2, 64 @ 64 1/2; No. 3, 63 @ 63 1/2; No. 4, 61 @ 61 1/2.

Rye—Firm. No. 2 western, 89 c. i. f. export and 90 f. o. b. New York. Barley—Steady. Maltster, 93 1/2 @ 97 1/2 c. i. f. New York export; feeding 44 lbs., nominal c. i. f. New York export.

Hay—Firm. No. 1, 155 @ 160; No. 2, 130 @ 135.

Straw—Firm. No. 1 straight rye, 95 @ 100.

Flour—Firm. Spring patents, 7.00 @ 7.50; clear, 5.50 @ 6.00; straight, 5.40 @ 5.65; winter patents, 6.85 @ 7.30; clear, 5.25 @ 6.00; straight, 6.30 @ 6.85.

Potatoes—Steady. Southern, 150 @ 350.

Dressed Poultry—Firm. Chickens, 30 @ 42; turkeys, 20 @ 40; ducks, 22 @ 23; broilers, 34 @ 43.

Live Poultry—Irregular. Turkeys, 20 @ 30; ducks, 17 @ 23; fowls, 19 @ 25; roosters, 14; geese, 14; broilers, 25 @ 43.

Butter—Steady. Creamery extra, 40 @ 43; creamery firsts, 39 @ 42; higher scoring, 38 @ 41; ladies fresh extra, 34 @ 35.

Eggs—Firm. Nearby white fancy, 40 @ 42; nearby brown, fancy, 35 @ 40; extras, 30 @ 32; firsts, 26 1/2 @ 28.

Milk—The nominal wholesale price is \$1.85 100 lbs. delivered in New York.

## TOLSTOY TO LECTURE AT NEW PALTZ

Count Ilya Tolstoy, son of the famous Russian author and philosopher, Count Leo Tolstoy, will lecture in the Normal School auditorium at New Paltz on Tuesday evening, July 15, at 8 o'clock.

He will be accompanied by Nicolai Ouloukanoff, a noted Russian baritone, who will give a recital of Russian songs.

**Purchases Cottage.**  
Christopher P. Roche, proprietor of the Central Paint Shop, Hasbrouck avenue, has purchased through George W. Moore, the real estate broker, one of the pretty cottages of John Duffner on Derrenbach street. Mr. Roche is busy beautifying the grounds about the place, and in the future will make this his home.

**State Road Worker Injured.**  
Nicholas Tracy of Pratt's Mills, Ulster county, employed by the Johnson Company on the state road construction near Pratt's Mills, is in Vassar Hospital with a fracture of the left leg, dislocation of the left hip and bruises to his back. Tracy was struck by one of the construction company's trucks.

**DIED.**  
SERVICE—At Stone Ridge, N. Y., July 12, 1924. Agnes Brown, wife of the late Thomas Brown.

Funeral at the chapel of A. Carr and Son, No. 1 Pearl street, on Tuesday at 2 o'clock. Interment in the Rosendale cemetery.

**SNYDER.**—On July 11, 1924, Mary J., wife of the late Lawrence Snyder.

Funeral at the chapel of A. Carr & Son, 1 Pearl street, on Monday at 10 a. m. Relatives and friends are invited. Interment in the Rosendale cemetery.

## Seaplane Makes World's Record

By Telegraph to The Freeman.  
Washington, July 12.—A new world's record for sustained flight by seaplanes was established today by the naval bomber C-52.

The plane, piloted by Lieuts. F. W. Wood and John D. Price was in the air from 3:20 p. m. yesterday until 6:39 this morning. The official flying time, according to the navy officials, was 15 hours, 19 minutes, which breaks all previous records for plane of that type.

## Not to Surrender American Rights

By Telegraph to The Freeman.  
Washington, July 12.—The United States government, in identical notes sent to the British, French and Spanish governments today, declined either to definitely approve or disapprove the Tangles agreement under which extra territoriality was abolished and control of the Straits Zone placed in the hands of an international governing body.

Before this government will give up its extra territorial rights in the zone, there must be adequate guarantees for the protection of American rights, equal economic opportunities for all nations, and assurances that the open door policy will be observed, the notes stated.

## About the Folks

Mrs. George C. Gildersleeve is spending some time visiting friends in Middletown.

Mrs. Robert Englebrecht, of 11 Smith avenue who has been visiting in New York city, has returned home.

Mr. and Mrs. Ira Myers and children are spending a few days with the Rev. M. Kalemjian and family of Kerkhonkson.

Miss Ernestine Fahr has returned to her home in Middletown after spending a few days as the guest of Mrs. George C. Gildersleeve.

Mr. and Mrs. Otto Thurn of 19 Smith avenue, who have been spending the past ten days at Syracuse and other points of interest upstate, have returned home.

Capt. Leonard Hazzard of the steamer Express of New York city, who has been spending a week with his daughter, Mrs. Leslie Munson, of Auburn street, has returned to his duties.

Mrs. E. O. Longendyke and granddaughter, Ruth Belle Longendyke, from Miami, Fla., who has been visiting her sister, Mrs. Charles Winne for the past four months have returned to her home.

## Society Notes

**A Coming Wedding.**

The marriage of Miss Helen Snyder, daughter of Mr. and Mrs. John A. Snyder of West Bridge street, Saugerties, to F. LeRoy Russell of Holyoke, Mass., will take place at the home of the bride's parents, Saturday, July 26th, at 6 o'clock p. m.

**Lounsbury-Contant.**

Gladys Contant and Charles Lounsbury of Stone Ridge were married Thursday, July 3, by the Rev. George Webber, pastor of the Stone Ridge M. E. Church. Miss Jennie Contant, sister of the bride, was bridesmaid and James H. Pallen of this city the best man.

**Lawrence-Barley.**

Harry H. Lawrence and Josephine Barley, both of Accord, were united in marriage at the home of the Rev. Walter Voigt Wednesday evening, June 25, at 6 o'clock. The bridesmaid was Miss Florence Lawrence, sister of the groom, and the best man was George L. Barley, brother of the bride. Following the ceremony a wedding supper was served at the immediate families of the bride and groom at the bride's home in Accord.

**Purchases Cottage.**

Christopher P. Roche, proprietor of the Central Paint Shop, Hasbrouck avenue, has purchased through George W. Moore, the real estate broker, one of the pretty cottages of John Duffner on Derrenbach street. Mr. Roche is busy beautifying the grounds about the place, and in the future will make this his home.

**State Road Worker Injured.**

Nicholas Tracy of Pratt's Mills, Ulster county, employed by the Johnson Company on the state road construction near Pratt's Mills, is in Vassar Hospital with a fracture of the left leg, dislocation of the left hip and bruises to his back. Tracy was struck by one of the construction company's trucks.

**DIED.**

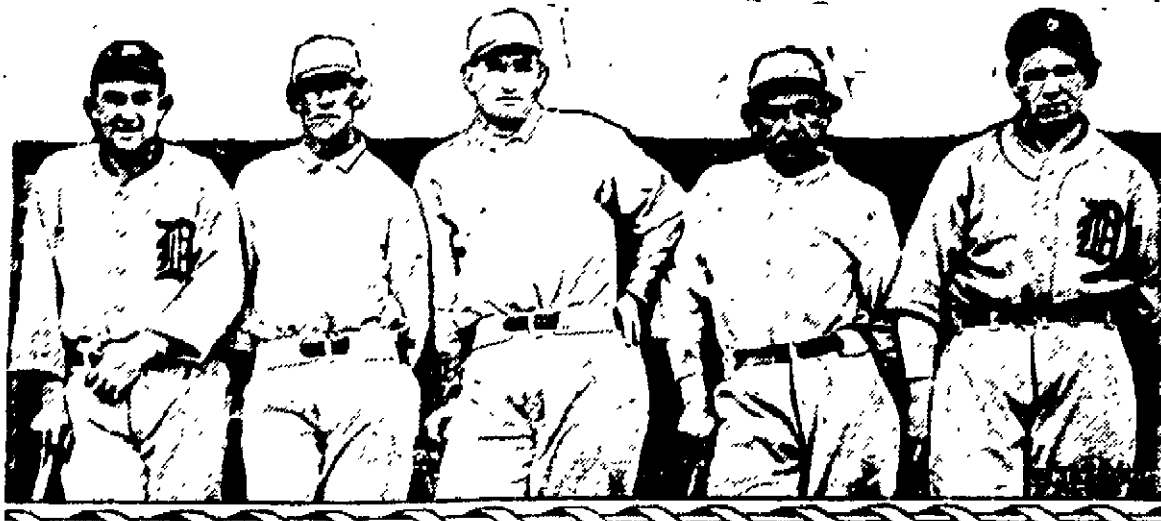

SERVICE—At Stone Ridge, N. Y., July 12, 1924. Agnes Brown, wife of the late Thomas Brown.

Funeral at the chapel of A. Carr and Son, No. 1 Pearl street, on Tuesday at 2 o'clock. Interment in the Rosendale cemetery.

**SNYDER.**—On July 11, 1924, Mary J., wife of the late Lawrence Snyder.

## Collection of Hardest Hitters of American League

This picture was taken when the Detroit Americans were playing in Boston. And the list of the league's leading batters show that of the first eight, five were playing in Boston. They are: Ty Cobb of Detroit, John Collins of Boston, league leader; Ike Boone of Boston, Harris of Boston, and Hellman of Detroit. Rather a unique collection of hitters.

## WRITER POKES FUN AT ZUPPKE'S IDEA

### Crabbiness Is Not Essential to Ancient Golf Game.

Bob Zupke, Illinois football coach, puts in a mean knock for golf with the opinion that the game makes "crabs" of those who play it, says Harry Cross, the humorist of the golf links. In the first place, it may immediately be assumed that Mr. Zupke does not shoot a very good game of golf. He talks just like another golfer who finds the fairways too narrow and the cups too small.

Scientific research will show that it isn't golf that makes golfers "crabby." They were that way before they took up the game at all. They are that way at home, in the subway and in the office. The business of being "crabby" is essentially a natural talent; one doesn't have to take up golf to acquire it.

For every "crab" there is in golf there are a score of good-natured comedians to laugh at him and make him worse. But why pick on the golf "crab" when there are so many in all other kinds of sport, amateur and professional?

Golf has never commenced to develop as many "crabs" as, for instance, bridge. There's a pastime which will make a squawker out of the most timid soul in the world. Have you ever seen one of those families where no one speaks to any one else? That's bridge.

Crabbiness is purely a personal accomplishment and is usually associated with the hard loser. It is a pity to saddle golf with the responsibility of it. Why, there are some people who would be "crabs" playing marbles. You will find them in all sports—tennis, baseball, mah-jongg, wrestling, poker, running, walking and checkers. The spirit of the crustacean will always be with us. The golf course isn't the only place you can find crawfish.

## How Walker Holds Club

Above is a closeup showing how Cyril Walker of Englewood, N. J., the new national open gold champion, holds his club when ready to drive. His victory in the open tourney at Detroit comes after many earlier defeats and disappointments.

## Athletic First Sacker Once Failed as Hurler

Joe Hauser, first baseman for the Philadelphia Athletics, began his professional baseball life as a pitcher back in 1918 when he reported to Connie Mack fresh from the much too sandy lots of North Milwaukee.

In training camp, Joe's first chance to show what he could do against major league batters showed him he was far from being a pitcher. Joe threw 45 straight balls without getting one near the base. Then Joe decided that he was cut out for something else.

He was farmed to Providence in the International league. He was supposed to come as a pitcher but told the manager he was a first baseman and outfielder. Joe displayed he could bat and was kept in the garden.

Later, he was shifted to first base and while playing that position for Milwaukee in 1922 was obtained by the Athletics once more. Hauser has never regretted his decision to quit pitching.

## Won Fame Early

Rosa Bonheur, the celebrated French painter of animal life and landscapes, exhibited her first picture when she was only eighteen years old. At the age of twenty-three she was awarded a gold medal at the salon.

## Great Players From Notre Dame College

A fan asks who was the best baseball player ever turned out of an Indiana college. That is a matter of opinion. Most of the great baseball players have come from Notre Dame. There was Sox, the great Indian outfielder of his day, whose bright career was short indeed.

There was Mike Powers, who caught for Indianapolis and for many years for the Athletics. There was Gibson, pitcher of the same era and later Ruelbach, star of Chance's championship Cubs. Later, there was Dubeck, pitcher, and Red Murray, catcher, who developed into a great outfielder with the Giants, and Daniels, first baseman and outfielder.

A rather fast bunch they were—those old-timers of Notre Dame. And Neph, with the Giants, who learned baseball at Rose Poly, was rather sweet as a collegian. Purdue turned out Traggesser, catcher. Indiana schooled in five or six weeks Mike Simon, who caught with the Pirates when they were world's champions. And it took a long line of years to harvest that bunch of great ones.

## Sporting Squibs

Stanislaus Zybsko may devote his time to developing young wrestling exponents.

A gentleman fighter is, we imagine, a person who insists on a lace-edged towel being thrown into the ring in moments of peril.

University of Chicago boasts of a freshman track squad. It is made up of 35 students, coached by Alonzo Stegg, Jr., with Tom Eck, trainer.

Theodore Kleinsasser of University of South Dakota rifle squad recently established a new United States record in scoring 307 points out of a possible 400.

From the viewpoint of gate receipts, Philadelphia is credited with being the most profitable town on the pugilistic map. For more than a generation the fight game has flourished continuously in the Quaker City.

William Fownes, Jr., of Pittsburgh will be the next president of the United States Golf association, according to inside reports. Fownes is a former national champion and one of the most popular men in the game.

The attention given by the United States Lawn Tennis association to junior tennis of late has resulted in a greater number of tournaments being scheduled for the younger players during the 1924 season than have ever been played before.

## Faber's Arm Back

Urban Charles Faber, star twirler of the Chicago White Sox, has regained the use of his good right arm and is taking his regular turn in the box again. It was thought for a time that Faber would never don a baseball uniform again.

## English Critic's Error

"Gammer Gurton's Needle," a comedy by Bishop Stilling, printed in 1575, was thought for some time to be the first English comedy, owing to an English critic's error as to the date of its publication.

## BASEBALL NOTES

The record for circling the bases is 15 4-5 seconds.

Baseball was a great game even before percentage columns were invented.

Portland, Ore., boasts 107 teams in 21 amateur and semi-pro baseball leagues.

The payroll of the New York American league baseball club is said to total about \$250,000 a year.

Wilson, Hutchinson outfielder, is setting the pace for home runs in the Western association.

Waterbury has bought Rip Conway from Worcester. He had been under suspension for difficulties with Jess Burkett.

Blackwell of the Oklahoma State league has a new manager. He is Hal Grun, formerly of the Tulsa Western league team.

Bobby Reece, farmed to Grand Rapids of the Mint league by Rochester, has been recalled. He will be used as utility infielder.

The St. Louis Browns appear to be one of the biggest obstacles in the path of the New York Yankees in its attempt to win the pennant for the fourth consecutive season.

Pete Ritchie, catcher for the San Francisco club of the Pacific Coast baseball league, has been farmed out to the Albany club of the Eastern league.

Playing his first year in professional baseball, Pitcher Ash, of Rocky Mount, twirled a hitless game against Norfolk in the Virginia league, winning 4-1. A dropped fly and two sacrifices accounted for the lone tally.

Chuck Palmer, former Northwestern University athlete, and at present coach of Englewood high school, has joined the Danville Three-I league team and will make a bid for an outfield berth.

The late Bill Donovan's father, who is eighty-four years old, is one of the ticket takers at the Phillies park. Despite his age the old gentleman is bright and lively and a great favorite with everybody.

Danville of the Piedmont league has released Pitcher Harry Allen and Second Baseman Belk. Allen is regarded as a high-class twirler, but Owner Herb Murphy of the Danville club says he failed to get into condition.

Manager Dick Breen of the Peoria team has begun a shake up due to the fact that the team has not been able to win consistently. Pitchers Gertner and Zwielfer were the first to go. Bailey, a former University of California pitcher, has been signed.

## "Spark Plug" of Club

Charles Leo Hartnett, catcher of the Chicago Nationals, who, it is claimed, is responsible for the good showing of his team. Outside of their good playing, it is he who with his never-failing chatter behind the bat and gingery actions is stamped as the root of all the snappy playing of the Cubs.

## Queer Memento

Raoul Coucy, Twelfth century French poet, when dying, ordered his French sent to the Lady of Fayel, whose husband forced her to eat it. She vowed she would never eat again and starved to death.

# The Percival Vivian Players

WHO gave so successfully two Shakespeare plays last year to an audience of fifteen hundred people in The Maverick Open-Air Theatre, will be with us again on

## Tuesday, July 15

(IF RAINY THE NEXT FAIR DAY)

afternoon and evening—5 o'clock and 9, daylight saving—with different productions. "The Three Bears, a popular modern play, and Shakespeare's "Comedy of Errors."

The Maverick Grounds will be free for the campfire picnics between the plays. A Dance in the Hall after ten-thirty.

Come Early, Stay Late,

Join the Moonlight Throng.

Joint Tickets for the Two Shows, \$1.50

Single Tickets, \$1.00.

## HOLDUP MEN AT ACCORD TOOK \$2 FROM NAVARRA

Four unknown holdup men staged a daylight holdup Friday evening about 6 o'clock along the state road one mile this side of Accord and got their man, Louis Navarra. Here the sensational part of the story stops however for the only thing that the holdup men got out of their man was a paltry \$2.

Mr. Navarra's story is that he was travelling in a Ford car when four men in an auto parked along the road stopped him. Two of the men got out of the car and hailed him. Navarra, thinking that the men desired some information, stopped whereupon one of the men pulled a gun and commanded him to hold up his hands.

The men then searched Navarra, found his \$2, took it and started in the direction of Accord, first commanding him to remain where he was and keep quiet. Two of the men were white and two were negroes. The man with the gun was six feet in height and wore a brown sweater.

The state police and sheriff's office were notified.

## LOCAL DEATH RECORD. Recent Deaths and Funerals of Persons in This Vicinity.

The funeral of Mrs. Oscar Bale, a sister of the late Mrs. Asa LeFevre, of New Paltz, was held in Salisbury, Orange county, on Thursday with interment in the New Hurley cemetery. Mrs. Bale's father, the Rev. R. H. Beattie, was at one time pastor of the New Hurley Reformed Church.

Agnes Brown, wife of the late Thomas Snyder, died at the residence of her son, Robert J. Service, at Stone Ridge, this morning. She is survived by three sons, William F. of Poughkeepsie, Jesse of Bayonne, N. J., and Robert J. Service of Stone Ridge. Funeral from the chapel of A. Carr & Son, No. 1 Pearl street, on Tuesday afternoon at 2 o'clock, daylight saving time, with interment in Wiltwyck cemetery.

Mrs. Mary J. Wells, widow of Lawrence Snyder, died Thursday. She is survived by three sisters, Mrs. Rufus LeFevre of this city, Mrs. Henry Tooker of Waterbury, Conn., and Mrs. Everett Becker of Saugerties; also three brothers, Herman S. Wells of Ellenville, John and William D. of New York city and a son, Bertrand Snyder, of Brooklyn. Funeral Monday morning at 10 o'clock from the chapel of A. Carr and Son, 1 Pearl street. Interment in Rosendale Plains cemetery.

Sue Johnson, wife of Frank Broadhead of Ellenville, died Saturday, July 5, at the Veterans' Memorial Hospital, Ellenville, after a short illness. The funeral was held at her home in Cantonville, near Ellenville, on Tuesday afternoon, at 2 o'clock. Mrs. Broadhead was held in high esteem by all who knew her and will be greatly missed by her family and many friends. She is survived by her husband, two stepsons, Percy Broadhead of Kingston, and Frank, Jr., at home; her mother, Mrs. Johnson, and two sisters, Mrs. John Lee and Mrs. Sarah Williams, all of this city. Interment in Fantinekill cemetery, Ellenville.

**At the Auditorium.**  
At the Auditorium tonight Douglas Fairbanks, Jr., assisted by Theodore Roberts, in his first picture, "Stephen Steps Out."

## Varnish Linoleum

It is an excellent plan to give linoleum a coat of white varnish. It will dry at once, leaving a fine polish, which is not at all slippery. Ordinary brown varnish is not suitable for the purpose.

## Living Face Masks

The making of plaster masks for living faces bids fair to supersede portrait-painting and photography in vogue. A well-known sculptor has established a studio for this purpose and is doing a thriving business. A majority of his clients being women.

A mask of this kind can be made in a quarter of an hour, and cost about \$25. The skin is smeared over with grease, the eyes closed by sticking plaster, and the ears stuffed with cotton-wool.

A tube between the lips, and another in the nostril, prevents suffocation, while long silk threads pass on the skin before the plaster is on make it easy to remove when "sitting" is over.

Masks of women made in this way are often finished off with wigs, those of men may be adorned with hats. Their terrible rigidity and dead like pallor have an effect which is both weird and gruesome to the last degree. But the sculptor could not get orders for statues and he had to live. So he started this business, which bids fair to become far more remunerative than the mere carving of marble.

**May Talk With Mars**  
As Mars nears the earth, scientists will attempt to communicate with possible inhabitants by means of powerful light rays. This attempt will be made in August from the heights of the Jungfrau, 14,000 feet up in the Alps. Light signals will be sent off by a powerful lens, the snows of the peaks acting as reflectors.

The theory that Mars is inhabited by a highly intelligent class of people was first evolved in 1877 after Schiaparelli, the Italian astronomer, found a series of long and regular straight lines on Mars which he believed were artificial canals. A few years ago color was lent to the theory by Marconi, who, in receiving strange wireless signals from an apparently unearthly source, said that they might have come from Mars.

## Oh, These Economies!

A young man, student at Butler college, who prides himself exceedingly on being a "man's man," is studying to be a teacher, and accordingly gets opportunity to do some practical work in a local high school.

Recently he had been giving some time to a girl pupil, who was somewhat backward in her studies. He liked to talk about other things than her studies, and he had a hard task to hold her to the point at issue. One of these restless occasions, she tried to obtain some information about him.

"And you go to Butler?" she asked. "What are you studying?" "Sociology and economics," he replied.

"Oh, you mean cooking?" she asked.—Indianapolis News.

## Rats Foster Mites

Government scientists have discovered another reason for getting rid of rats. It is a blood-sucking mite allied with rats that is making things annoying and dangerous for man in southern states. Certainly, when the back of a man where his clothing is tight, their bites are painful and the crawling and running about annoying. It has been found that the way to repress the mites is to kill off rats and spray rat nests with kerosene.

## A Great Help

Customer—I want a couple of lowcases.  
Clerk—What size?  
Customer—I don't know, but I want a size 7 hat.—Stanford Chaparral.

## Bridgeport Team Here Tomorrow

This afternoon at the Fair Grounds, the Colonials are playing the Chappie Johnson All Star outfit.

Sunday at the Fair Grounds the Hall Community team of Bridgeport, Conn., will oppose the Colonials. Ralph and Haynes, who played in the sand lot leagues here a number of years ago, will be with the visitors. The twins are said to be the youngest boys in fast company today and their work entitled them to bids from the Eastern League teams. Others on the team, who are scheduled to appear here are Pete Wilson, a former Yankee pitcher, Slats Gallagher, a Giant recruit, Pat Lavery, considered one of the best scholastic pitchers in Connecticut, and Gearin and Tackison, college players.

The Hall Community team comes here as one of Connecticut's best teams.

## Fullers Beat Van Slyke Nine

At the Athletic Field Friday evening, the Fullers downed the Van Slyke team in a regular Industrial League game by the score of 6 to 4. Rowland and Lindhurst did the mound work for the winners and Plo-kie for the losers. The score:

Van Slykes	AB	R	H	PO	A	E
Wright, 1b	3	1	1	8	0	0
Cassidy, ss	4	1	1	1	1	0
Baker, 2b	4	0	0	4	4	0
Plank, p	2	1	0	2	0	0
Blanchard, rf	3	0	1	0	2	0
Storck, lf	2	1	1	1	0	0
Lewis, 3b	2	0	0	1	1	0
Ferraro, cf	2	0	0	1	0	1
Kozloskie, c	3	0	0	6	0	1
Totals	24	4	4	21	9	1

Fullers	AB	R	H	PO	A	E
C. Lucidko, 3b	3	0	0	1	1	0
Poyer, ss	3	2	0	1	1	1

## Swatfest Enjoyed By Colonials

Schrickmen Hit 10 Safeties and Make 14 Runs Against Oneonta at Stamford Friday—Morgan Pitched Good Game.

The Colonials of this city closed their current argument with the Oneonta baseball club in a very emphatic manner at Stamford on Friday afternoon when they handed Manager Thomas's men a 14-5 trouncing. It was the worst defeat that the Oneonta club has suffered this year.

The Schrickmen started out on a batting rampage in the first inning and didn't let up until the end of the ninth inning at which time it was discovered that the local players had found Davis and Walsh of the Oneonta club for nineteen hits, three of which were home runs by McCue, Robins and Flynn. Lefty Davis started the contest for the Giants but lasted less than three innings when he was relieved by Walsh who stayed in for the rest of the game despite the fact that he had no license to stay in beyond the sixth inning when the Colonials found him for five runs.

Mike Morgan did the hurling for the Schrick clan. Morgan was effective throughout the entire game and only got in very serious trouble in the fifth and seventh innings when the Oneonta players scored three runs and two runs respectively. However, with his team mates hitting as they were on Friday, Morgan didn't have to worry about five runs or two times five runs being chalked up against him. Morgan held the Oneonta players down to seven hits.

The first three men to face Davis in the first inning found him for three hits and resulted in two runs being chalked up on the Colonial side of the ledger. In the second inning Robins found the southpaw for a home run and tally number three was chalked up for the Colonials. Home runs by McCue and Flynn and a number of base hits thrown in for good measure gave the local club three more runs in the third inning.

The local players then let up for two innings—just to catch their breath. In the sixth inning the onslaught started again. Hits by Schwab, Dugan, McCue and Flynn, with a number of errors thrown in by the Oneonta players, pushed five more Colonials over the rubber. Dugan's two base hit, Deegan's single and another blow of like proportions by Raskin accounted for two more in the seventh. The last run came in the ninth inning when Morgan hit a triple and came in on Deegan's single.

Oneonta scored their five runs in the fifth and seventh innings respectively.

Colonials	AB	R	H	PO	A	E
Dugan, cf	6	3	4	1	0	0
Deegan, 2b	5	2	3	2	0	0
McCue, 3b	5	2	3	1	0	0
Raskin, rf	5	0	1	6	0	0

## Swatfest Enjoyed By Colonials

Flynn, ss	AB	R	H	PO	A	E
Coyle, 1b	5	1	0	12	0	0
Schwab, lf	5	1	3	0	0	1
Robins, c	5	2	2	2	0	0
Morgan, p	5	2	1	0	4	0
Totals	25	7	10	17	10	2

Score by innings:  
Colonials ..... 2 1 3 0 5 2 0 1—14  
Oneonta ..... 0 0 0 3 0 2 0 0—5

Two base hits—Dugan, Fitch and Walsh. Three base hits—Morgan. Home runs—Robins, McCue, Flynn, Boylan. Double plays—Faye, Fitch and Wilson (2). Bases on balls—Walsh, 1; Morgan, 3. Struck out—By Davis, 1; by Walsh, 4; by Morgan, 2. Hit by pitcher—By Morgan (Faye); by Walsh (McCue). Umpires—Griffin and Brown. Time of game—2 hours.

## TAGGING ALL THE BASES IN THE MAJOR LEAGUES

Five home runs garnished the slugfest between the Yanks and White Sox, the former getting the verdict 12 to 9. Ruth got number 24.

Washington surrendered first place to New York through a 4 to 3 defeat at the hands of the Tigers.

The Red Sox and Browns had a stand off in their double header, the Browns winning the first easily, 8 to 1, and losing the second in the ninth 7 to 6.

Helmeach gave the Indians only four hits while the Athletics got 14 and won 10 to 1.

Five runs in the tenth gave the Giants a 10 to 5 victory over the Cardinals, three home runs aiding.

The Reds made it four out of five by blanking the lowly Phillies 6 to 0. Cooper turned in his fifth straight victory for the Pirates in defeating the Braves 8 to 2.

Fournier got two home runs, the fifth time this season, and the Robins had no trouble at all with the Cubs, winning 9 to 1.

## ALL STARS PLAY AT MAYBROOK SUNDAY

Manager McCordie has booked the Kingston All Star Club to play in Maybrook Sunday. Maybrook has one of the fastest semi-pro clubs in the state recently breaking even with the Poughkeepsie Red Sox in two games. The local club was defeated by the railroaders Decoration Day, and are going to work hard to even matters up. McCordie will have the regular lineup with Chester catching and Stoudt, Van Buren and Connolly doing the hurling.

The local management has received word from Rob Parkinson that he will arrive here next week. Parkinson comes from military academy and is said to be one of the best infielders on the varsity this season. He will be on hand for the game with the local Chevys next week.

## New Auditorium Theatre
